The eagle has relatively sharp definition on the tail feathers and the left (facing) wing affirms that the piece has avoided heavy circulation wear. Liberty's curls at the top of the head and above the shoulders retain splendid inner detail. The peripheral legends are sharp. Tradition has it that these pieces came from President Washington's silver, and were dispersed by Washington himself. There is little doubt that the issue was referred to by Washington in his November 6 address to Congress, when he mentioned the "small beginning in the coinage of half-dimes." PCGS Price Guide...\$90,000

3879717	4461	1796 Draped Bust Dime -- NGC MS63	\$29,500	JR-3. Rarity-5. The finer of only two known examples of the JR-3 terminal die state, and a condition census representative of the variety as a whole. Beautifully toned in even steel gray patina, with iridescent pale gold undertones. The strike is bold and sharp in all areas, and the underlying satin luster is vibrant. As a type, the Draped Bust Small Eagle Dimes are the most challenging of the entire denomination to acquire, especially in higher grades. At the top of the condition census, this dime is a specialist's delight. NGC Price Guide...\$42,500.
3741005	4470	1800 Draped Bust Dime -- NGC AU58	\$11,500	Only 3 Finer Known certified by NGC. Scarce Near-Mint. Desirable as the last year of the eighteenth century and as a substantially scarcer issue overall, the attractive surfaces make this an especially appealing specimen to any early dime cabinet. Nicely centered and well executed in strike, both sides exhibit overall bold definition within uniformly denticulated borders. A smooth and inviting piece.
3843903	4470	1800 Draped Bust Dime -- PCGS MS62	\$22,000	JR-2, R.5, MS62 PCGS. Just two die marriages exist for the 1800 dimes, both share the same obverse with different reverses. All Mint State 1800 dimes are rarities. This MS62 example is exceeded by only a handful of specimens at PCGS. Dappled amber-gold toning intermixes with lilac and bright-silver areas on the obverse, while the reverse is a bit more toned in the same shades. A strong strike on the devices. This lightly toned example offers nice eye appeal and is an important opportunity for the advanced early dime specialist. Population 3 in 62, 4 finer (10/18). PCGS Price Guide...\$22,000,

4129711	4480	1807 Draped Bust Dime -- PCGS MS64+	\$16,750	JR-1, the only known dies. Sporting a subtle vanilla hue across both sides and the central design elements are boldly to sharply rendered to allow full appreciation of this classic early Mint design. Prominent clash marks in the obverse field are as made, and there are no detracting blemishes to call into question the validity of the impressive near-Gem grade assigned by PCGS. The final issue in the Draped Bust dime series, and always in demand to represent the Heraldic Eagle reverse design in type sets, the 1807 is a strong performer in all grades. In the finer Mint State grades, as here, this issue is scarce to rare, especially relative to the demand that such pieces enjoy among today's quality conscious collectors. PCGS Price Guide in MS64...\$16,500. In MS65...\$42,500.
4061011	4486	1809 Capped Bust Dime -- NGC MS64	\$15,900	JR-1, R.4. The only die marriage for this scarce date, which boasts a mintage of just 51,065 pieces. Diagnostics for JR-1 include a "Scarface" die break on Liberty's cheek, a center dot (perhaps from a compass point) at the top of her neck, and a slightly softer strike on UNITED than the remainder of the legends. This is a splendid example with medium forest-green, golden-brown, and lavender-gray toning. Above the E in AMERICA, a slender strike-through (as made) provides an identifier. NGC Price Guide...\$18,000
4065103	4503	1825 Capped Bust Dime -- PCGS MS64+	\$6,250	Handsome pewter-grey surfaces splashed with pale blue and highlights of violet manifested on the reverse. Gracious and pleasing soft luster surrounds the recessed areas of design. The devices are well struck exhibiting a bold relief. This is a high grade example with exceptional eye appeal. PCGS Price Guide...\$7500

A faint die crack travels upward from the obverse border at 6 o'clock, bisecting the die. PCGS Price Guide...\$7500.
4061003	4561	1837 Seated Liberty Dime, No Stars Large Date -- NGC MS65	\$4,750	The Seated Liberty design was introduced in 1837, and the No Stars obverse was discontinued in 1838, making this issue extremely important for type collectors. The reported mintage in 1837 was 682,500 pieces, including both the Large Date and Small Date varieties. The Large Date is easily recognized by the flat topped 3. The present coin is a delightful Gem, with sharply detailed devices and attractive blue and gold patina. NGC Price Guide...\$6900
3728810	4579	1841 Seated Dime -- NGC MS65	\$2,500	In Gem condition, this date is decidedly rare, and the present example is especially attractive. Forest-green, gold, lilac, and rose toning are a visual delight, and the design elements are sharp.
4129705	4668	1874 Seated Liberty Dime - NGC MS65	\$2,600	Blast White. Satiny and brilliant surfaces are smooth and attractive with most design elements sharply struck. Miller specimen will make an appealing addition to another high grade set. NGC Price Guide...\$3500,

Originally and expertly preserved surfaces exhibit steel-blue and olive-gray peripheral toning that yields to lighter champagne-apricot iridescence toward the centers. Associated by date with a low mintage circulation strike issue, the 1879 is one of the more eagerly sought Proofs in the later Liberty Seated dime series. This is a remarkable condition rarity that is sure to impress even the most discerning numismatist. NGC Price Guide...\$2525

4121911	5426	1853 Seated Quarter with Arrows and Rays -- PCGS MS66	\$24,000	Three numerically finer. Ex. Pogue Collection. In the late 1840s and early 1850s silver coins in circulation began to disappear, as they were either hoarded or melted. The Mint tried to compensate by making large quantities of the gold dollar denomination that began production in 1849, but smaller coins still were needed. By 1851 silver Seated coinage had all but disappeared from circulation. The melt value of a Liberty Seated silver dollar rose to \$1.034 by 1851. By 1853 the situation was so dire that the net silver content of all silver coins was reduced. The Mint signified the silver reduction by placing arrows on either side of the date on the affected coins, and a ring of rays on the reverse of the quarters. This is an attractively toned piece whose fields are semi-reflective, which enlivens the mottled, multicolored toning seen across each side. Sharply defined. PCGS Price Guide...\$29,500.
4121912	5426	1853 Seated Quarter with Arrows and Rays -- NGC MS66+	\$29,500	This Premium Gem nearly ranks among the finest surviving examples. 4121906	39201	1794 Flowing Hair Half Dollar O-105a -- NGC VF20	\$11,500	T-3, R.6 Tompkins Die State 3. The rarer late die state of the Overton-105 die pairing, with a reverse crack from the dentils to the first T in STATES, and another from the eagle's right (facing) wingtip to the rim. Die failure on the reverse weakens the center, and on this piece the eagle's head is obscured by a combination of die buckle and wear. The remainder of the eagle is defined, though, and the remnants of adjustment marks are visible. The obverse is better-defined in the center, showing a bold and complete outline of Liberty's portrait. Old-time olive-green, gold, russet, and lilac-gray toning in the margins surrounds golden-gray interior color. The coin is problem-free and appealing. NGC Price Guide Estimate...\$18,500.

Observant numismatists noticed the difference in star count at an early date. NGC Price Guide...\$80,000.

4079108	7156	1884-S Morgan Dollar -- NGC MS62+	\$25,000	Blazing White. Bright and lustrous. For the grade, this 1884-S Morgan dollar is quite spectacular. Incredibly radiant cartwheel luster on each side adds to the eye appeal. This is a well-struck coin, deservedly receiving a plus designation. Quality such as this for the MS62 grade level is rarely seen on any Morgan dollar. It is especially significant for this coin since it is an 1884-S, a semikey date that is elusive in this grade regardless of eye appeal. NGC Price Guide..\$21,800. In MS63...\$48,500.

Wisps of iridescent powder blue adorn the peripheries and give way to pinkish-rose and champagne-pink toward the centers. The most intense toning is reserved for the reverse border, while the center on that side is close to brilliant. Frosty luster and bold to sharp striking detail are also noted. Bass-Dannreuther Die State a/b. 1807 is the final year for the Capped Bust Right type, which had ruled the denomination since its 1796 debut. 4121919	7663	1824/1 \$2.5 Capped Bust Left -- NGC MS61	\$33,000	Bass-Dannreuther Die State a/a. Mintage...2600. It's estimated only about 40 to 60 pieces are known. The entire production was struck from a single die pair, fashioned from a leftover 1821 obverse die and paired with a reverse of 1821. The fraction numerals are distant from the fraction bar. This 1824/1 shows a mere trace of an underdigit 1, which appears as a tine off the diagonal of 4. PCGS and NGC report just 50 certified from the mintage, most in circulated grades. Mint State examples are scarce. This MS61 example displays vibrant, sun-gold color and remnants of prooflike surface, particularly on the obverse. NGC Price Guide...\$41,750.

The surfaces appear pristine save for delicate field contact near star 3. Only 165 proofs were struck, and many were eventually spent by families during hard times. Examples of the present quality are highly desirable. NGC Price Guide...\$24,300
4015202	7928	1902 \$2.5 Liberty Head -- NGC PF66	\$15,500	Mintage...193. First Year of the All-Brilliant Finish. JD-1, R.4. The 1902 quarter eagle recorded 193 proofs struck (all from a single pair of dies), of which 120 to 140 pieces are estimated to have survived today. This year also marked the Mint's brief experimentation with the all-brilliant (no contrast) finish for not only proof gold, but indeed proofs of all denominations and metals. While proof quarter eagles from this year are generally available in lower grades they are a challenge to locate in premium condition. This is a bright yellow-gold example whose surfaces are essentially flawless. The strike definition is complete throughout. NGC Price Guide...\$25,500
4015203	7929	1903 \$2.5 Liberty Head -- PF66	\$15,500	Mintage...197. Scarcer JD-2 Variety. High R.5. A generous mintage of 197 proof Liberty quarter eagles was achieved at the Philadelphia Mint in 1903, with the coins delivered in quarterly batches of 96, 22, 27, and 52 pieces. Two different die pairs were used to strike the proofs this year. The coin offered here represents the scarcer JD-2 variety, with the date positioned farther to the right and the 1 farther from the dentils. John Dannreuther estimates the surviving population of JD-2 at 40-60 examples in all grades. The Mint switched to an "all-brilliant" finish for proofs the year before, with minimal frosting of the design elements and little field/device contrast. The present coin is a spectacular Premium Gem, with razor-sharp definition on all design elements and deeply mirrored fieldst. The well-preserved orange-gold surfaces add to the outstanding eye appeal. NGC Price Guide...\$24,500.
4018501	7929	1903 \$2.5 Liberty -- PCGS PR67	\$23,000	Mintage...197. Finest Known at PCGS. R.4. Ex: Simpson. A fully struck specimen with seamless reflective fields. Blushes of orange toning appear on the portrait and date, as well as portions of the borders. Blatant cameo contrast is displayed by the stars, legends, eagle, and curls. Despite a mintage of just 197 pieces, two die pairings are known for the proof 1903 quarter eagle. They are distinguished by slightly different date positions. Also, on JD-1, the lower loop of the 9 in the date is lightly repunched. PCGS Price Guide...\$38,000
3839710	7931	1905 \$2.5 Liberty -- NGC PF66 CAC	\$18,500	Mintage...144. Brilliant proofs were in vogue at the Mint in 1905, with few proofs struck with substantial contrast between the fields and devices. Mirrorlike radiance gleams from bright, glassy fields of this Premium Gem example. Together, NGC and PCGS report a mere eight finer specimens than the present CAC-endorsed PR66 example. This example displays a rich olive-gold hue and is notable for a full strike. This piece represents very nice quality for the grade, and the fact that it has been approved by CAC is further evidence that it is wholesome and appealing. 4028608	8919	1856-S \$20 Liberty SS Central America & Pinch of Gold -- PCGS MS61	\$8,500	A bright, lustrous example of this date -- which is famous for being among the coins recovered from the S.S. Central America. The SS Central America was a paddle steamboat that sailed between various countries in Central America and New York and other ports along the East Coast of the US. During a hurricane the ship sunk, losing the lives of 420 passengers and crew. Also lost was more than 30,000 pounds of gold coins and bars. The coins remained beneath the Atlantic Ocean off the Carolinas for the next 130 years. This extremely rare coin includes a pinch of California Gold Dust and comes with a beautiful display box along with a certificate of authenticity from PCGS. CW Trends...\$11,000

A satiny texture and bright honey-orange patina round out an impressive list of physical attributes for this key date coin. Most specimens are found in VF or EF condition with AU examples quite rare. It has been written that "a strictly graded EF is very rare and, above that level, the 1866-S No Motto is excessively rare and, for all practical purposes, unavailable." This coin is an extraordinary stand-out survivor and a landmark specimen of one of the most challenging issues for the series. NGC Price Guide...\$200,000
3988504	9044	1903-S \$20 Liberty -- PCGS MS65	\$13,500	PCGS lists only 18 coins this fine, with none in higher grades (6/20). Sharp design elements and exceptional preservation further add to the eye appeal. A clear rarity, among the finest known of the date. PCGS Price Guide...\$15,000.
4061021	9135	1907 \$20 Saint High Relief Wire Rim -- NGC MS65	\$36,000	This Gem example fully demonstrates the High Relief's enduring popularity. The surfaces are bright and satiny and the strike is complete in all areas. The fin, or Wire Rim, is well-pronounced. DID YOU KNOW? Only 12,367 High Relief double eagles were struck in 1907, from a design by esteemed American sculptor Augustus Saint-Gaudens. Fortunately, the issue enjoyed a high survival rate, as the coins were never released into circulation. Although most of the mintage was sent to Subtreasuries for regular distribution, Mint and Treasury officials snapped up the coins as soon as they were shipped and sold them to VIPs and coin dealers at a steep markup. Roger W. Burdette estimates the surviving population at about 8,000 examples in all grades today. NGC Price Guide...\$44,000

9990005	11217	1836 Gobrecht Dollar (J-58) -- NGC PF64	\$95,000	Gobrecht-designed dollars were struck in 1836 to reintroduce the denomination to a new generation. The strike details are full with complete hair definition. All the eagle's breast feathers are completely articulated on the reverse. The production of 18 pieces for the Name Below Base is an apocryphal mintage that is traceable to Edward Cogan in 1867. While no exact mintage is known for this issue, judging from the number of survivors known somewhere around 60 to 100 pieces were probably made. As with all Gobrecht dollars, they were struck in proof format and most likely struck twice to bring up high point definition. This is a stunning Judd-58. The fields are brightly mirrored and devoid of any noticeable contact marks. As mentioned above, the striking definition is strong. The foot of Liberty is the usual place to look for fullness of strike on a Gobrecht dollar, and here it has medal-like clarity of detail. The centers are brilliant with light golden toning encircling the margins. Mintage...probably 60 to 100.
9991840	11478	Undated (1840) P25C Quarter Dollar Master Die Impression, Judd-110, Pollock-123, Unique, and Companion White Metal Hub Trial Piece PR64 NGC.	\$100,000	UNIQUE. Regarded in the past as a hub impression of the modified Gobrecht Seated Liberty design. We believe this is a trial from the master die. This is the With Drapery design that is struck on an oversized planchet. This impression was struck, according to the Judd book, after Robert M. Patterson asked Robert Ball Hughes to prepare a plaster medallion of Gobrecht's design for use as the basis for a new hub. The surfaces are bright greenish-brown with oil-slick iridescence in the fields. As mentioned, some of the brass has flaked away. The companion piece encased in the NGC holder is a uniface hub trial, which shows a reversed impression of the design. Rarely Traded. Auction record from 2007...\$69,000.
4042302	511836	1759(1999) Washington Family Home Dollar, J-2185 -- NGC MS64	\$3,750	Mintage unknown. Only five certified. The Martha Washington design, previously used to test clad coinage circa 1965, was revived in 1999 to test "golden" alloys for the pending Sacagawea dollar. Struck in manganese-brass-coated copper-clad metal with a plain edge. In a Mike Castle signature holder. Lustrous and sharply struck. No Price Guide Information.
3989303	515264	"1781" (2004) Libertas Americana Medal -- PCGS Proof-68 DCAM	\$5,250	Paris Mint Restrike. Gold. No 0235/1776. 40 mm. 43 grams. As struck with gorgeous golden-orange surfaces that are boldly contrasted in finish between mirrored fields and frosty design elements. This is a perennially popular design in American medallic history, represented here by an expertly produced "restrike" from the Paris Mint.
3879718	528569	1866-Dated \$3 J-C1866-2 Merriam fantasy -- NGC UNC Details	\$15,000	UNIQUE. This Enigmatic "1866" Three Dollar Pattern by Joseph H. Merriam displays the Popular Lincoln Portrait Design that has Unique Gold Striking with a Plain Edge "1866" (1868). The obverse features A bearded bust of President Lincoln facing right, the motto GOD AND OUR COUNTRY above and the date 1866 below. The Reverse displays a wreath of oak and laurel surrounding the denomination as a Roman numeral III. Scroll ornamentation is at the top of the wreath, and includes a six-pointed star. Delightful satin to softly frosted surfaces display a sharp to full strike throughout. Even medium gold patina is evident on both sides. Closer inspection with a loupe reveals light filing here and there around the rims that confirms the NGC qualifier. This piece is attractive and of the utmost rarity and significance.
4129709	52	Undated (ca. 1828) American Plantations Token - Restrike - PCGS MS61	\$1,350	A pleasing example of the type, both sides exhibit sharp striking detail to the central design elements. Deep pewter gray patina throughout. The present example is certainly highly desirable.
