3741601	1001	1766 William Pitt Half Penny "Cracked Planchet" -- NCG MS63B	\$4,500.00	Betts-519, Breen-251, W-8350, R.3. Copper. From a historical standpoint, the Pitt farthings and halfpennies rank among the most important Colonial issues of early America. This issue commemorates the efforts of William Pitt to have the Stamp Act repealed. The current piece is remarkable on several levels. It is a technical mint error struck on a cracked planchet that is visible from the obverse border at 10:30 and the reverse border at 7:30, extending in toward the center of the flan. It is also an amazing Mint State specimen, one of the finest we have seen. This is only the 10th auction appearance of a Mint State Pitt halfpenny in any of our sales since 1993. Both sides have a lovely blend of tan and chocolate color with beautiful, original surfaces. Census: 1 in 63 Brown, 2 finer (4/10). CDN Collectors Price Guide...\$12,100. Only three finer certified by NGC.
3636901	1233	1855 Half Cent - NGC MS66 BN	\$1,350.00	Tied for finest known. An unabrased and undisturbed type coin with intermingled olive-brown, ebony, and faded red color on each side. The strike is bold. NGC Price Guide...\$2700.
3740601	1422	1797 One Cent, Rev Stems, -- PCGS MS64BN CAC	\$19,500.00	S-135. Rarity-3+. This piece boasts lovely eye appeal with original glossy brown patina to overall smooth, satiny features. The strike is well centered for the type, and it is sharp in all areas. A particularly popular variety for advanced type purposes. Any Mint State Draped Bust cent is a scarce coin indeed.
25671403	2204	1899 1C MS67RD PCGS	\$4,950.00	Only 2 Finer Known. Coppery-gold coloration and swirling, frosty luster are sure to please collectors looking for this superb premium 19th century type coin. The ribbon diamonds and feathers are needle-sharp. PCGS Price Guide...\$6750

3856501	2921	1969-S 1C Double Die Obverse - PCGS AU53	\$19,000.00	Mintage...15. Ranked #1 in 100 Greatest U.S. Modern Coins. The 1969-S doubled die Lincoln cent is one of the most dramatic and arguably the rarest variety in the entire series. The variety was first discovered in mid-1970 and was at first erroneously thought by the U.S. Secret Service to be counterfeit. After the confusion was resolved, and collectors were free to pursue these coins, the discovery rate was few and far between. It is believed that no more than 30 pieces are known today in all grades. The doubling can be seen in the word "Liberty" on the obverse. The present Choice AU coin displays original auburn-brown patina, with tinges of coppery-red in the protected regions. The strike is sharp and this is a highly appealing example of this intriguing 20th century rarity. PCGS Price Guide...\$24,000

3993401	4258	1797 15 Stars Half Dime --NGC MS64	\$28,000.00	V-2, LM-1, R.3. Three distinct obverse design subtypes exist for the 1797 half dimes, featuring 13 stars, 15 stars, or 16 stars. The 15 Stars type has an arrangement of eight stars to the left and seven stars to the right. Only a small number of Mint State examples exist, including about four Gems that are slightly finer than this Choice Mint State piece. We place it at about fifth or sixth finest of the variety. The elements are quite boldly defined. Both sides have full satin luster, the obverse pale gray with hints of blue, and the reverse mostly gold with sea-green and iridescent accents. NGC Price Guide...\$44,500.

3701507	4461	1796 Bust Dime -- NGC MS64	\$44,000.00	Rare This Choice. The "Hyphenated Date" Variety. Always popular as the first year of regular-issue federal dimes. The JR-6 die marriage is the second-most available 1796 variety, yet it is scarce in Choice Uncirculated condition such as this coin. A ring of blue and reddish-tan album toning surrounds the obverse, with partially reflective fields and a frosted portrait of Liberty. Numerous die cracks include a pair of intersecting cracks with die chipping at the date (the so-called "hyphenated date"). The central strike is sharp despite die cracks that radiate to the centers of both sides. CDN Collectors Price Guide for a common date coin in this series...\$60,500.
3740602	4470	1800 Bust Dime -- NGC MS60	\$17,500.00	Bold and Brilliant 1800 Draped Bust Dime. JR-2. Rarity-4+. Uncommon Mint State preservation for both the issue and the type, this is one of the most significant 1800 dimes. Satiny surfaces also reveal semi-reflective qualities in the obverse field as the coin dips into a light. Beautiful eye appeal with most viewing angles presenting a silver white coin. The strike is bold within fully uniform denticulated borders. Far smoother in hand than one might expect for the assigned grade -- highly recommended for inclusion in an advanced type or variety set.
3741005	4470	1800 Draped Bust Dime -- NGC AU58	\$11,500.00	Only 3 Finer Known certified by NGC. Scarce Near-Mint. Desirable as the last year of the eighteenth century and as a substantially scarcer issue overall, the attractive surfaces make this an especially appealing specimen to any early dime cabinet. Nicely centered and well executed in strike, both sides exhibit overall bold definition within uniformly denticulated borders. A smooth and inviting piece.
3728810	4579	1841 Seated Dime - NGC MS65	\$2,500.00	In Gem condition, this date is decidedly rare, and the present example is especially attractive. Forest-green, gold, lilac, and rose toning are a visual delight, and the design elements are sharp.
3899682003	4605	1854 Arrows 10C - NGC MS65	\$1,350.00	F-102, High R.4, MS65 NGC. Ex: Highland Collection. A vertical die defect in Liberty's lap is diagnostic of the variety. This Gem example is frosted and lustrous over lightly iridescent silver surfaces. The strike is sharp with some deeper toning on the reverse legend. NGC Price Guide...\$2200
3728811	4668	1874 Arrows Dime - NGC MS66	\$3,600.00	F-101a, R.2. This is a remarkable, bright semiprooflike example that shows deep blue and russet rings surrounding the margins on each side. NGC Price Guide...\$4650

A little more than 200,000 dimes were struck in San Francisco in 1886, making the 1886-S a slightly better date in all grades and genuinely scarce in Mint State. This delightful coin displays vibrant mint luster under iridescent champagne-gold and varying shades of ocean-blue color. The design elements are sharp and eye appeal is excellent NGC Price Guide...

In this die state, the obverse has yet to form a break through star 3, while a rim cud has developed between ER on the reverse. O-104 is a rare die marriage, as are most varieties for the 1794 half dollar. Interestingly, the reverse die was produced using a unique master hub (see Tompkins p. 437 for distinguishing features). This Fine 12 example exhibits deep gunmetal-gray patina that lightens over the motifs, which show relatively good detail, especially on the eagle. The obverse exhibits numerous crisscrossing adjustment marks, but the surfaces are otherwise smooth. NGC Price Guide...\$12,250

3636913	39201	1794 Flowing Hair Half Dollar O-101A - NGC F15	\$7,500.00	Tompkins Die State 1/5. Olive, charcoal, and steel-gray tones blend over this smooth, well-worn flowing hair representative. Outlines of the central devices and the peripheral design elements are bold. A wonderful example of this extremely popular first-year issue. NGC Price Guide...\$12,250
3728907	6051	1794 Flowing Hair Half Dollar - NGC VF20	\$11,500.00	O-101a, T-7, High R.3, VF20 NGC. Tompkins Die State 1/5. This is a deeply toned, sharply defined VF example of the Flowing Hair design, an historic two-year type by the Mint's Chief Engraver, Robert Scot. The 1794 is much more challenging than the 1795 for type, yet it is infinitely more desirable as the first year of issue for both type and denomination. Shades of gunmetal-gray and deep lavender cover both sides. Light obverse adjustment marks are confined to a small area on the central hair strands and along the lower-right border. NGC Price Guide...\$25,500.

3615615	39201	1794 Flowing Hair Half Dollar O-101A - NGC VF30	\$14,500.00	Popular O-101a, T-7 Variety. Tompkins Die State 1/3. Only 23,464 Flowing Hair half dollars were struck in 1794, with 11 die varieties known for the date. Star 1 pierces the lowest curl near the center on this coin, and there are 21 berries, arranged 10 left and 11 right on the reverse, that identify the popular O-101 variety. This impressive VF30 example retains some interior detail on the central portion of Liberty's hair and all major design detail remains intact. The pleasing surfaces are blanketed in shades of lavender-gray and golden-brown toning and a shallow scrape below star 8 is the only abrasion of note. Hints of original luster shine through the patina. NGC Price Guide...\$25,500.
3636914	39201	1794 Flowing Hair Half Dollar O-101A - NGC VF20	\$15,500.00	Strong Details Remain. Tompkins Die State 1/5. This coin may be struck from a late state of the dies, but it shows none of the die sinking responsible for the often-seen weakness in the centers. The eagle's head features a strong outline, and good definition remains on a few of the wing feathers. The same is true of Liberty's portrait, which exhibits partial delineation of the middle curls, not just the lower ones. Patina is lighter over the relief elements than it is in the fields, as expected. A smooth and appealing example of the date. NGC Price Guide...\$25,500.

3615617	39201	1794 Flowing Hair Half Dollar O-101A - NGC XF40 CAC	\$39,000.00	Smooth, Appealing Surfaces. Well deserving of the CAC designation. The 1794 half dollar is most often seen in heavily circulated grades, frequently with cleaning, tooling, or other impairments. High-end circulated coins are rare, and in this condition there is little room to be choosy when it comes to die variety. This Choice XF coin represents exceptional quality for the issue. The olive-gray surfaces are smooth and unquestionably original, showing lighter patina on the high points of the devices. Strong hair and wing feather detail remains, with wear visible on Liberty's cheek and the eagle's breast. The borders are sharp and free of adjustment marks, although some of the latter are seen within Liberty's hair strands. Only 23 finer (3/18). NGC Price Guide...\$39,750. PCGS Price Guide...\$51,000.

3718909	6343	1873 Arrows Half Dollar WB-109, Bold Doubled Die Obverse - N	\$8,750.00	Small Arrows, Doubled Die Obverse, WB-109, FS-101, MS65 NGC. This Small Arrows variety exhibits arguably the boldest die doubled obverse in the entire Seated Liberty half dollar series. The doubling is easily seen on Liberty's gown folds, fingers, and foot, as well as the scroll, and the shield stripes which exhibit four lines each instead of the normal three. This variety is rare in Mint State, although the 1873 With Arrows half dollar is a rarity at the Gem grade level regardless of variety. This coin displays soft, satiny luster beneath intermingled shades of burgundy-red, olive-green, and gunmetal-gray toning. The strike is sharp making this an important piece for the advanced Seated half dollar specialist. NGC has seen only seven pieces in this grade (two in MS65+), all varieties included, with just four finer (4/18). CDN Price Guide for a common date in this series...\$15,400.

3706806	6443	1882 Seated Half Dollar - PCGS PR66	\$2,950.00	Mintage...1100. Lovely original toning. While the various mints were concentrating on Morgan dollars throughout the 1880s, smaller denomination silver coins had extremely low mintages. 3728911	6466	1893-O Barber Half Dollar - NGC MS66	\$7,750.00	Among the Finest Certified. This is a rare opportunity for a collector to obtain one of the finest representatives of this early Barber half. Splendid green-gray, gold, and crimson peripheral toning encircles the lighter silver-gray centers. The strike is razor-sharp, showing no mentionable weakness on either side -- a pleasing exception to the rule for O-mint coins. Glowing luster radiates beneath the vibrant toning. 3700807	6476	1896-S Barber Half - PCGS MS64	\$3,250.00	Like the 1896-S Barber quarter, this half dollar issue is a better date in the series. Examples are scarce but obtainable in near-Gem condition. Soft mint luster radiates beneath shades of deep steel-gray patina. PCGS Price Guide...\$5000.
3719814	6476	1896-S Barber Half Dollar -- PCGS MS64	\$3,250.00	Dusted with pale silver and gold iridescence, this is a fully struck and satiny near-Gem with pleasingly smooth surfaces throughout. The 1896-S is truly elusive in Mint State. Uncirculated survivors can be accounted for in terms of dozens rather than hundreds. Evidently few examples of this issue were set aside by contemporary numismatists, and as a consequence, quality examples always command high premiums. PCGS Population: 24; 22 finer (MS-67 finest). 3636920	6482	1898-S Barber Half Dollar - PCGS MS65	\$5,100.00	Only six finer known. Shades of cobalt-blue, olive-green, and violet color the obverse. The reverse exhibits golden hues overall, with areas of plum and teal at the extreme outer edges. PCGS Price Guide...\$8000
3662302	6493	1902-O Barber Half - NGC MS65	\$5,300.00	The 1902-O Barber half dollar was a workhorse of commercial channels. Mint State survivors are generally scarce, and Gems are rare. This piece shows beautifully preserved, frosty luster cast in lovely orange-gold, lavender, and champagne-gray hues.
3700808	6493	1902-O Barber Half Dollar - PCGS MS64	\$3,350.00	This New Orleans issue is elusive in many Mint State grades, and pieces grading finer than the present are rare. This Choice coin displays satiny luster and a hint of light golden border toning. PCGS Price Guide...\$4500.
3700809	6496	1903-O Barber Half Dollar - PCGS MS64	\$1,525.00	Violet-gray patina includes accents of blue, green, and gold. Perhaps the most impressive feature is the full strike seen on the forecurls, stars, shield corner, and fletchings.
3718914	6502	1905-O Barber Half Dollar - PCGS MS66 CAC	\$6,600.00	Low-Mintage Issue, Few Are Finer. This Premium Gem displays pleasing luster, and the coin is sharply struck. Orange-gold patina with bluish and lavender accents enhance the coin's eye appeal, as do the nicely preserved surfaces. CAC endorsement affirms the above-average quality. PCGS Price Guide in MS66...\$8000. In MS67...\$24,000.
3502009	6508	1907 Barber Half Dollar - PCGS MS65	\$1,800.00	A moderately toned, satiny example that is sure to catch the eye of Gem type collectors. Conditionally scarce from a mintage of 2,598,000 circulation strikes, a respectable total by Barber half dollar standards. Only 8 finer known. PCGS Price Guide...\$2500.
3636921	6514	1908-O Barber Half Dollar - NGC MS67	\$8,250.00	Only One Finer Certified. The eye appeal of this Superb Gem New Orleans Barber half dollar is its primary attribute. 3680204	6878	1799 Draped Bust \$1 - NGC XF40	\$3,750.00	BB-163, B-10. Rarity-2. Olive-gray patina dominates the obverse appearance, although the reverse is predominantly pewter gray in tone with only speckled highlights of the former. 3732701	6889	1800 Dotted Date Silver Dollar - NGC MS64	\$117,500.00	Likely third finest known. Ex: Eliasberg. B-14, BB-194, R.3. Die State IV. This is the well-known Dotted Date variety, so named for the small die chips that encircle the first 0. Bowers comments in his Silver Dollar Encyclopedia that "tiny dot-like die breaks appear in many other places, particularly between L and I, under nose, before chin, below first star, and under the 6th and 7th stars. The steel used to make this die must have been defective." This coin is mostly grayish-gold with tinges of pinkish-gold appearing on the reverse along with a bit of electric blue.
3705804	6937	1850 Seated Dollar - PCGS MS62	\$8,500.00	Mintage...7500. PQ! This is a thoroughly appealing 1850 silver dollar -- a key date issue. Prooflike in finish, both sides exhibit satiny devices and mirrored fields beneath an overlay of smoky silver-apricot patina. The strike is quite well executed for the type with sharp definition throughout the design. Solidly graded with a pleasant appearance. Long recognized as one of the more elusive issues in the Liberty Seated silver dollar series, just 7,500 circulation strike 1850 silver dollars were made. This is the lowest yearly output from either the Philadelphia or New Orleans mints since the introduction of the Liberty Seated design in 1840. Only 10 finer certified by PCGS. 3502011	7046	1877-S Trade Dollar - NGC MS65	\$4,750.00	A warmly toned piece with full satin luster and sharp striking detail. With 9,519,000 pieces produced, the 1877-S has the highest mintage in the brief trade dollar series of 1873 to 1883. Although most examples were shipped to the Orient, as intended, enough coins remained stateside or were later repatriated that this issue is readily obtainable in both circulated and lower Mint State grades. Gems are rare, however, especially relative to the demand from today's quality conscious type collectors. NGC Price Guide...\$12,000
3637007	7055	1875 Trade Dollar - NGC PF66	\$8,900.00	Mintage...700. Type Two Reverse. Period after FINE. This is an exceptional proof Trade dollar with deeply mirrored fields. Output fell dramatically over the previous year, from 1,987 specimens in 1880 to just 960 pieces in 1881. Dusky patina and pronounced field reflectivity. The motifs are fully struck. NGC Price Guide...\$9750.
3637009	7063	1883 Trade Dollar - NGC PF66	\$8,900.00	This is the last of the collectible Trade dollars, marking the end of the proof-only series that began in 1878. 3856502	8533	1929 \$5 Indian - PCGS MS63	\$33,000.00	The final-year 1929 half eagle is the most significant rarity in the series, although its mintage of 662,000 coins would never lead one to suspect that was the case. The issue's lack of availability stems directly from the economic context in which it was produced. By October 1929, the American economy was in freefall -- a position it would remain in through the early to mid-1930s. The five dollar gold coin was not needed in circulation, and few 1929 half eagles were distributed to banks. Instead, the majority sat in Treasury vaults and were melted after 1933. This Select Uncirculated example is strongly struck throughout with mint luster that is softly frosted and radiates over the warm yellow-gold surfaces. PCGS Price Guide...\$43,500.

3719820	9222	1900 Lafayette Dollar -- PCGS MS65	\$3,950.00	Mintage...36,026. Exceptionally smooth surfaces on both sides, this impressive Gem also exhibits pleasingly original toning with mottled rose-russet iridescence over a base of warmer pearl gray. Authorized by the Act of March 3, 1899, this silver dollar commemorates the construction of a monument to General Lafayette erected at the 1900 Paris Exposition. Although the Philadelphia Mint struck 50,000 pieces for distribution, the maximum allowed by Congress, only 36,000 coins were eventually sold and the remaining 14,000 examples were melted. An additional 26 pieces were prepared for Assay purposes. Today, the Lafayette dollar is regarded as one of the more conditionally challenging types in the classic commemorative series. This uncommonly well preserved Gem is sure to have no difficulty finding its way into a high quality set. PCGS Price Guide...\$6000.

9990005	11217	1836 Gobrecht Silver \$S1 (J-58) - NGC PF64	\$95,000.00	Gobrecht-designed dollars were struck in 1836 to reintroduce the denomination to a new generation. The strike details are full with complete hair definition. All the eagle's breast feathers are completely articulated on the reverse. The production of 18 pieces for the Name Below Base is an apocryphal mintage that is traceable to Edward Cogan in 1867. While no exact mintage is known for this issue, judging from the number of survivors known somewhere around 60 to 100 pieces were probably made. As with all Gobrecht dollars, they were struck in proof format and most likely struck twice to bring up high point definition. This is a stunning Judd-58. The fields are brightly mirrored and devoid of any noticeable contact marks. As mentioned above, the striking definition is strong. The foot of Liberty is the usual place to look for fullness of strike on a Gobrecht dollar, and here it has medal-like clarity of detail. The centers are brilliant with light golden toning encircling the margins. Mintage...probably 60 to 100.
3542101	11354	1838 Seated \$1 (J-85) Res. - PCGS PR65+ CAC	\$190,000.00	Mintage...Unknown. These pieces are extremely rare. Many variants of Gobrecht dollars were struck beginning in 1836, continuing in 1837, 1838, and 1839, picking up again in the late 1850s and continuing through the 1870s. Of these many issues the only date that is believed to actually have been coined as a pattern is the 1838. Each side displays variegated shadings of rose, blue, golden, and brown, lighter in the center of the obverse and deeper around the margin. The strike is full. This includes complete definition on the foot of Liberty, the eagle's breast feathers, and the right-side stars on the obverse.
