<b>Collectible Type</b>						
3315101	17	1662	Small 2 Oak Tree 2 Pence	NGC MS63 CAC	\$22,000.00	PCGS Price Guide \$40,000. This well-preserved gunmetal-gray example has a fully struck tree, date, and denomination. All letters are completely present, despite moderate obverse misalignment toward 7 o'clock. Listed on page 38 of the 2016 Guide Book. It has been the plate coin used in several publications.
3500402	698	1791	Liverpool Halfpenny	PCGS AU55	\$4,250.00	Mintage...Unknown. Baker-17, Musante GW-19, W-10650. Rarity-6. Copper. Lettered Edge. Glossy medium copper surfaces reveal tinges of lighter reddish-brown patina in isolated areas. Sharing the same obverse die as the 1791 Washington Large Eagle cents, the Liverpool halfpenny is part of a large series of tokens that circulated widely in Great Britain in the 1790s. These provincial pieces came to be known as Conder tokens after James Conder, an Ipswich merchant who, in 1798, published one of the first popular lists of these tokens. While many Conder tokens were produced specifically for the numismatic market, the Liverpool halfpenny appears to have been intended for use in circulation in Britain to alleviate the chronic shortage of small change, as almost every known specimen is found with some degree of wear. This is a particularly pleasing example that will appeal to the dedicated collector of early Washingtoniana. PCGS Price Guide...\$5000
3500403	767	N.D. (1795)	Liberty and Security Penny	PCGS MS64 BN	\$2,950.00	Mintage...Unknown. A lovely piece, both sides exhibit splashes of iridescent steel-rose peripheral toning to otherwise golden-brown surfaces. The devices are fully struck with exceptionally sharp detail to Washington's bust and the reverse eagle. The texture is satiny and overall smooth, direct lighting calling forth vivid undertones of salmon pink and orange-apricot that further enhance already strong eye appeal. This is a truly outstanding example of this popular British Conder token, a type that has long been included in American cabinets due to its association with our nation's first president. PCGS Price Guide...\$3300

3456301	4251	1795 H10C V-4, LM-10, R.3 - MS65 PCGS. CAC	\$47,500.00	Mintage...78,660. Lustrous, Late Die State Example. Splendid luster and surfaces that are problem-free are the calling cards of this Gem Flowing Hair half dime -- quite a conditional rarity in so fine a grade. Glints of gold, aqua, and jade are more prominent at the rims on each side, with coin-gray centers and a bold strike throughout. The relative availability of the LM-10 die marriage will make this piece a logical, key acquisition for type collectors. For the 1795 date, PCGS reports 11 examples in MS65, one in MS65+, and 14 finer (9/16). This piece is one of only five in MS65 with the CAC green approval sticker. 2227008	4356	1853 Arrows H10 - NGC MS67	\$7,900.00	None Finer. The entire half dime series from 1794 to 1873 lacks another issue that challenges the 1853 Arrows in terms of availability. More than 13.2 million coins were struck after a reduction in silver weight was authorized to stimulate their circulation. The 1853 Arrows is also the first of a three-year type, reducing the supply relative to demand, especially in high grade. This top-graded, lightly toned Superb Gem offers orange, violet, and lavender hues intermixed over each side with windows of brilliance. Well-struck and frosty. Price Guide...\$10,500.
3410001	4356	1853 Arrows H10C - NGC MS66+ CAC	\$2,950.00	Among the second highest certified. A spectacular Premium Gem representative of the popular Arrows design, with well-detailed design elements. Well deserving of both a CAC and NGC plus designations. NGC Price Guide In MS67...\$10,500.

Distinctively beautiful and highly reflective, this coin resembles the one-sided Proofs found in the Smithsonian Institution. Both sides are deeply and beautifully toned a rich yellow gold that deepens in the fields and around the peripheries, but preserves the cherished faint green among the satiny details of the reverse. The obverse is boldly, stunningly reflective, with cameo contrast between the frosty device and the fields that pool outside them. The peripheral flowlines of almost crystalline character, often seen on Proof coins of this era, are seen radiating from the center just inside the denticles. Every detail is boldly struck, including every curl on Liberty's head and the center of each star. The rim is crisp, if not perfectly square everywhere. --- The most notable aspect of this variety is its overdate, long identified as 1825/1, though this specimen clearly shows the upper A-framed angle of a 4 beneath the final date digit. PCGS is calling this an 1825/4/1. From the Pogue Collection. PRICED ON REQUEST.</b>

9990005	11217	1836 Gobrecht Silver \$1 (J-58) - NGC PF64	\$100,000.00	Gobrecht-designed dollars were struck in 1836 to reintroduce the denomination to a new generation. The strike details are full with complete hair definition. All the eagle's breast feathers are completely articulated on the reverse. The production of 18 pieces for the Name Below Base is an apocryphal mintage that is traceable to Edward Cogan in 1867. While no exact mintage is known for this issue, judging from the number of survivors known somewhere around 60 to 100 pieces were probably made. As with all Gobrecht dollars, they were struck in proof format and most likely struck twice to bring up high point definition. This is a stunning Judd-58. The fields are brightly mirrored and devoid of any noticeable contact marks. As mentioned above, the striking definition is strong. The foot of Liberty is the usual place to look for fullness of strike on a Gobrecht dollar, and here it has medal-like clarity of detail. The centers are brilliant with light golden toning encircling the margins. Mintage...probably 60 to 100.
