4422287	11020	1792 Half Disme -- PCGS VF25	\$85,000	Mintage...1500. Less than 100 known. Historic First Year of the Denomination. Deep dove-gray toning consistently drapes both sides of this desirable early Federal silver issue. The eagle has relatively sharp definition on the tail feathers and the left (facing) wing affirms that the piece has avoided heavy circulation wear. Liberty's curls at the top of the head and above the shoulders retain splendid inner detail. The peripheral legends are sharp. Tradition has it that these pieces came from President Washington's silver, and were dispersed by Washington himself. There is little doubt that the issue was referred to by Washington in his November 6 address to Congress, when he mentioned the "small beginning in the coinage of half-dimes." PCGS Price Guide...\$90,000

3879717	4461	1796 Draped Bust Dime -- NGC MS63	\$29,500	JR-3. Rarity-5. The finer of only two known examples of the JR-3 terminal die state, and a Condition Census representative of the variety as a whole. Beautifully toned in even steel gray patina, with iridescent pale gold undertones. The strike is bold and sharp in all areas, and the underlying satin luster is vibrant. As a type, the Draped Bust, Small Eagle dimes are the most challenging of the entire denomination to acquire, especially in higher grades. At the top of the Condition Census, and with the added appeal of an extensive provenance tracing back nearly 65 years, this dime is a specialist's delight. PCGS Price
3741005	4470	1800 Draped Bust Dime -- NGC AU58	\$11,500	Only 3 Finer Known certified by NGC. Scarce Near-Mint. Desirable as the last year of the eighteenth century and as a substantially scarcer issue overall, the attractive surfaces make this an especially appealing specimen to any early dime cabinet. Nicely centered and well executed in strike, both sides exhibit overall bold definition within uniformly denticulated borders. A smooth and inviting piece.
3843903	4470	1800 Draped Bust Dime -- PCGS MS62	\$22,000	JR-2, R.5, MS62 PCGS. Just two die marriages exist for the 1800 dimes, both share the same obverse with different reverses. All Mint State 1800 dimes are rarities. This MS62 example is exceeded by only a handful of specimens at PCGS. Dappled amber-gold toning intermixes with lilac and bright-silver areas on the obverse, while the reverse is a bit more toned in the same shades. A strong strike on the devices. This lightly toned example offers nice eye appeal and is an important opportunity for the advanced early dime specialist. Population 3 in 62, 4 finer (10/18). PCGS Price Guide...\$22,000,
3312556001	4480	1807 Draped Bust Dime w/ Heraldic Eagle, Type 2, JR-1 -- NGC MS65	\$29,500	This Gem is far finer than most survivors. The strike is bold and all other details are sharp. Originally and expertly preserved surfaces exhibit steel-blue and olive-gray peripheral toning that yields to lighter champagne-apricot iridescence toward the centers. Associated by date with a low mintage circulation strike issue, the 1879 is one of the more eagerly sought Proofs in the later Liberty Seated dime series. This is a remarkable condition rarity that is sure to impress even the most discerning numismatist. NGC Price Guide...\$2525
3569503	4806	1895 Barber Dime -- PCGS MS66	\$4,250	From a small mintage of 690,000 pieces, the 1895 Barber dime is the rarest Philadelphia Mint issue of the series. 3719809	4852	1909-O Barber Dime -- PCGS MS66	\$2,800	Lustrous surfaces are splashed with mottled olive-gray, cobalt blue and medium rose patina that is more extensive on the obverse. Sharply struck throughout, and uncommonly so for the issuing mint, this conditionally scarce Gem represents a significant find for the advanced specialist in New Orleans Mint and/or Barber coinage. The historic 1909-O is the final dime produced in the Louisiana coinage facility. Despite a mintage that is nearly twice as large (2,287,000 vs. 1,789,000 pieces), this issue is rarer than the 1908-O in all Uncirculated grades. More challenging to locate than the 1892-O, 1893-O, 1905-O, 1906-O and 1907-O, as well, the 1909-O is sought after at all levels of Mint. PCGS Population: 17; 6 finer (MS-67 finest). 4121911	5426	1853 Seated Quarter with Arrows and Rays -- PCGS MS66	\$24,000	Three numerically finer. Ex. Pogue Collection. In the late 1840s and early 1850s silver coins in circulation began to disappear, as they were either hoarded or melted. The Mint tried to compensate by making large quantities of the gold dollar denomination that began production in 1849, but smaller coins still were needed. By 1851 silver Seated coinage had all but disappeared from circulation. The melt value of a Liberty Seated silver dollar rose to \$1.034 by 1851. By 1853 the situation was so dire that the net silver content of all silver coins was reduced. The Mint signified the silver reduction by placing arrows on either side of the date on the affected coins, and a ring of rays on the reverse of the quarters. This is an attractively toned piece whose fields are semi-reflective, which enlivens the mottled, multicolored toning seen across each side. Sharply defined. PCGS Price Guide...\$29,500.

4121912	5426	1853 Seated Quarter with Arrows and Rays -- NGC MS66+	\$29,500	This Premium Gem nearly ranks among the finest surviving examples. 3636915	39201	1794 Flowing Hair Half Dollar O-104 -- NGC F12	\$6,900	Mintage...23,464. Evenly Struck. Tompkins Die State 1/3. In this die state, the obverse has yet to form a break through star 3, while a rim cud has developed between ER on the reverse. O-104 is a rare die marriage, as are most varieties for the 1794 half dollar. Interestingly, the reverse die was produced using a unique master hub (see Tompkins p. 437 for distinguishing features). This Fine 12 example exhibits deep gunmetal-gray patina that lightens over the motifs, which show relatively good detail, especially on the eagle. The obverse exhibits numerous crisscrossing adjustment marks, but the surfaces are otherwise smooth. NGC Price Guide...\$12,250
3636913	39201	1794 Flowing Hair Half Dollar O-101A -- NGC F15	\$7,500	Tompkins Die State 1/5. Olive, charcoal, and steel-gray tones blend over this smooth, well-worn flowing hair representative. Outlines of the central devices and the peripheral design elements are bold. A wonderful example of this extremely popular first-year issue. NGC Price Guide...\$12,250
3636914	39201	1794 Flowing Hair Half Dollar O-101A -- NGC VF20	\$11,500	Strong Details Remain. Tompkins Die State 1/5. This coin may be struck from a late state of the dies, but it shows none of the die sinking responsible for the often-seen weakness in the centers. The eagle's head features a strong outline, and good definition remains on a few of the wing feathers. The same is true of Liberty's portrait, which exhibits partial delineation of the middle curls, not just the lower ones. Patina is lighter over the relief elements than it is in the fields, as expected. A smooth and appealing example of the date. NGC Price Guide Estimate...\$18,500.
3988507	6051	1794 Flowing Hair Half Dollar -- NGC AU58	\$95,000	O-105a, Scarce Variety. Condition Rarity for the Date. On this coin, only minor wear is visible on the wing tops and tips. A soft strike through the centers reduces feather definition on the eagle's neck, breast, and forward leg. A number of light adjustment marks that were not entirely eliminated by strike and extend across the portrait. Remnant mint luster remains among the devices. The appearance of any 1794 half dollar in an AU58 holder is a significant numismatic event. Price Guide...\$212,500. CDN Retail Price Guide...\$211,800
3762201	6052	1795 Flowing Hair Half Dollar, 2-Leaves, O-125 -- NGC XF45	\$8,500	O-125, T-13, R.4, XF45 NGC. Tompkins Die State 2/1. The 1795 half dollar is often encountered in type specialists' collections. This piece is of a scarce variety, characterized in part by star 1 fully piercing Liberty's lower hair curl. Rich gunmetal-gray and dusky olive-gold patina coats each side, with well-defined design elements. NGC Price Guide...\$9,200
1601691001	6057	1796 Draped Bust Half Dollar 15 Stars - NGC VF20	\$69,000	Mintage 934. Only 100 known. This coin represents the O-101 variety, with 15 obverse stars arranged in an 8 x 7 pattern around the bust. The O-101 obverse was probably completed before June 1, 1796, when Tennessee joined the Union as the 16th state, but delivery warrants confirm no half dollars were struck until February of 1797. Observant numismatists noticed the difference in star count at an early date. NGC Price Guide...\$80,000.
3967104	39262	1796 Draped Bust Half Dollar, Overton 102 16 Stars -- PCGS VF25	\$72,000	Mintage: 934. Here is a handsome, original coin toned in a base of warm antique silver patina. Both sides are further enhanced by splashes of bolder charcoal-gray, golden-olive and, to a lesser extent, reddish-apricot toning. The strike is ideally centered on the planchet, the borders fully and uniformly denticulated around both the obverse and reverse. All devices are fully outlined with sharp detail in the protected areas of the design. PCGS Price Guide...\$85,000
3967105	6060	1797 Draped Bust Half Dollar Small Eagle -- PCGS F12	\$47,500	O-101, T-1. Rarity-4 plus. 15 Stars. This lovely piece exemplifies the scarce earlier state of the O-101 dies, estimated to be about twice as rare as the later one by Tompkins. A predominantly light silver gray example with warmer sandy-gold patina in the protected areas. All devices are boldly outlined with this classic early U.S. Mint design. Mintage: 2984; PCGS Price Guide...\$55,000

4042410	6159	1831 Capped Bust Half, O-103 - NGC MS64	\$2,300	O-103, R.1. Both sides are nicely detailed with pleasing and lustrous medium gray surfaces and hints of pale gold toning.

4042403	6280	1854-O Arrows Seated Half Dollar	\$13,500	WB-101, Die Pair 33, R.3. This Premium Gem appears to be from the early die state before the die crack developed in the right obverse field. This lovely example has frosty silver luster, bold design definition beneath dappled gold and steel toning at the borders, and gold toning outlining the light silver-gray devices. PCGS Price Guide...\$16,500.
4080211	6288	1856-O Seated Liberty Half Dollar (Doubled Date) -- PCGS MS65	\$3,600	WB-9. Rarity-5. Late Die State. Doubled Date. This handsomely toned example is awash in blended copper-gray, olive, pale rose and powder blue, the most vivid color reserved for the peripheries. Sharply struck by the standards of the issuing mint, both sides also offer billowy mint luster and an exceptionally smooth appearance. PCGS Price Guide...\$5,750

3718909	6343	1873 Seated Liberty Half Dollar Arrows, Bold Doubled Die Obverse -- PCGS MS65	\$8,750	Small Arrows, Doubled Die Obverse, WB-109, FS-101, MS65 PCGS. This Small Arrows variety exhibits arguably the boldest die doubled obverse in the entire Seated Liberty half dollar series. The doubling is easily seen on Liberty's gown folds, fingers, and foot, as well as the scroll, and the shield stripes which exhibit four lines each instead of the normal three. This variety is rare in Mint State, although the 1873 With Arrows half dollar is a rarity at the Gem grade level regardless of variety. This coin displays soft, satiny luster beneath intermingled shades of burgundy-red, olive-green, and gunmetal-gray toning. The strike is sharp making this an important piece for the advanced Seated half dollar specialist. PCGS Price Guide....\$12,000.
404390	86443	1882 Seated Liberty Half Dollar -- NGC PF67 Cameo	\$5,900	Mintage...1100. A delightful specimen with mottled toning that is most vivid around the peripheries. 3835513	6461	1892 Barber Half Dollar (Tripled Die Reverse) -- NGC MS66	\$3,300	Tripled Die Reverse, Multicolor Toning. FS-801. Although undesignated as such on the NGC insert, this is the Cherrypickers' variety with clear tripling of design elements throughout the reverse periphery. This lustrous and boldly struck Premium Gem offers dappled forest-green and plum-red toning across much of both sides. Smooth aside from faint contact at the centers. 3762216	6473	1895-S Barber Half Dollar -- PCGS MS65	\$4,100	This may well have been one of the first half dollars off the press at the San Francisco Mint in 1895. The strike is fully defined on the stars, curls, talons, fletchings, and shield corner. Variegated toning is a shade lighter on the obverse compared to the reverse, while frosty luster shines from underneath the patina on each side. The cheek and fields are clean. Incredibly radiant cartwheel luster on each side adds to the eye appeal. This is a well-struck coin, deservedly receiving a plus designation. Quality such as this for the MS62 grade level is rarely seen on any Morgan dollar. There is no denying their place among the most sought-after issues in American coinage. Indeed, these coins often spur collectors to put together sets of the more collectible silver half dollar, gold dollar, and gold two and a half dollar with the hope that someday a large fifty dollar gold piece will take its place among them. Two 1808/7 varieties exist for this popular Guide Book listing. Both varieties are quite scarce, with 130 or fewer examples available for collectors. This coin represents the more-available BD-2 variety. Obverse die failure led to the demise of each 1808/7 die marriage. This exceptionally vibrant MS62 coin displays two heavy obverse die cracks that confirm the BD-2 attribution. A long crack bisects the obverse from star 2 across the portrait between E and R of LIBERTY, exiting at the top of the cap. A second crack runs radially from the edge near star 11 through the top two points, across the field, and into Liberty's back curls. From a nominal mintage of 29,060 pieces, the 1825 Capped Head Left half eagle is an elusive issue, with three die varieties known for the date. This example displays a rich olive-gold hue and is notable for a full strike. This piece represents very nice quality for the grade, and the fact that it has been approved by CAC is further evidence that it is wholesome and appealing. There are just five 1825/4/1 half eagles graded higher than MS61 at PCGS and it is likely that most will not be available to advanced collectors for many years to come. 3988511	9132	1907 High Relief \$20 Saint-Gaudens -- NGC PF64	\$35,000	One could reasonably argue that all High Reliefs are special strikes and therefore deserve to be termed proofs. However, the case for proof status by NGC rests on the basis of "first among equals." Yes, all High Reliefs were specially struck, in ways no strikes for circulation ever were. But several hundred pieces were produced with very crisp strikes and swirling die polish lines. Since the mid-1980s these special strikes have been associated with one pair of dies and one collar. This die pair and collar were not used after the production run for proofs. However, it should be noted the collar had been previously used to strike several Ultra High Reliefs. This is a well-preserved proof with satiny surfaces that are bright throughout and have taken on a light accent of reddish patina. As expected, the strike is extraordinarily sharp. 3719820	9222	1900 Lafayette Dollar -- PCGS MS65	\$3,950	Mintage...36,026. Exceptionally smooth surfaces on both sides, this impressive Gem also exhibits pleasingly original toning with mottled rose-russet iridescence over a base of warmer pearl gray. Authorized by the Act of March 3, 1899, this silver dollar commemorates the construction of a monument to General Lafayette erected at the 1900 Paris Exposition. Although the Philadelphia Mint struck 50,000 pieces for distribution, the maximum allowed by Congress, only 36,000 coins were eventually sold and the remaining 14,000 examples were melted. An additional 26 pieces were prepared for Assay purposes. Today, the Lafayette dollar is regarded as one of the more conditionally challenging types in the classic commemorative series. This uncommonly well preserved Gem is sure to have no difficulty finding its way into a high quality set. PCGS Price Guide...\$6000.

3729601	9296	1892 Columbian Half (Looks Prooflike) -- NGC MS65 CAC	\$1,000	The aqua, ocean-blue, and violet-rose shadings across much of the obverse lend instant eye appeal. Similar toning is present at the reverse periphery, as well as mustard-gold. Distinctly reflective and undeniably attractive. In our opinion -- this piece is Proof-like. The last Columbian in NGC MS65PL with NO CAC sticker brought \$1140 in Auction. Put a CAC sticker on the coin like this piece, and you decide the value!

Both sides of this superb gem exhibit satiny silver luster with pristine surfaces that display traces of peripheral iridescence. NGC Price Guide...\$42,500.
3988505	9307	1922 Grant with Star Half Dollar -- PCGS MS66	\$4,950	Only 4 Finer Known at PCGS. Laura Gardin Fraser's Grant Memorial half dollar was issued both with and without a small incuse star in the right obverse field. The Star variant is by far the scarcer of the two. Only 4,256 pieces were distributed, and in MS66 this issue is decidedly scarce. The present coin displays satiny luster beneath dusky champagne-gray toning. The devices are well struck, and eye appeal is pleasing. PCGS Price Guide...\$7000

9990005	11217	1836 Gobrecht Dollar (J-58) -- NGC PF64	\$95,000	Gobrecht-designed dollars were struck in 1836 to reintroduce the denomination to a new generation. The strike details are full with complete hair definition. All the eagle, Æôs breast feathers are completely articulated on the reverse. The production of 18 pieces for the Name Below Base is an apocryphal mintage that is traceable to Edward Cogan in 1867. While no exact mintage is known for this issue, judging from the number of survivors known somewhere around 60 to 100 pieces were probably made. As with all Gobrecht dollars, they were struck in proof format and most likely struck twice to bring up high point definition. This is a stunning Judd-58. The fields are brightly mirrored and devoid of any noticeable contact marks. As mentioned above, the striking definition is strong. The foot of Liberty is the usual place to look for fullness of strike on a Gobrecht dollar, and here it has medal-like clarity of detail. The centers are brilliant with light golden toning encircling the margins. Mintage...probably 60 to 100.
9991840	11478	Undated (1840) P25C Quarter Dollar Master Die Impression, Judd-110, Pollock-123, U	\$100,000	UNIQUE. Regarded in the past as a hub impression of the modified Gobrecht Seated Liberty design. We believe this is a trial from the master die. This is the With Drapery design that is struck on an oversized planchet. This impression was struck, according to the Judd book, after Robert M. Patterson asked Robert Ball Hughes to prepare a plaster medallion of Gobrecht's design for use as the basis for a new hub. The surfaces are bright greenish-brown with oil-slick iridescence in the fields. As mentioned, some of the brass has flaked away. The companion piece encased in the NGC holder is a uniface hub trial, which shows a reversed impression of the design. Rarely Traded. Auction record from 2007...\$69,000.
4042302	511836	1759(1999) Washington Family Home Dollar, J-2185 -- NGC MS64	\$3,750	Mintage unknown. Only five certified. The Martha Washington design, previously used to test clad coinage circa 1965, was revived in 1999 to test "golden" alloys for the pending Sacagawea dollar. Struck in manganese-brass-coated copper-clad metal with a plain edge. In a Mike Castle signature holder. Lustrous and sharply struck. No Price Guide Information.

As struck with gorgeous golden-orange surfaces that are boldly contrasted in finish between mirrored fields and frosty design elements. This is a perennially popular design in American medallic history, represented here by an expertly produced "restrike" from the Paris Mint.
