PCGS #	Colonials, Tokens & Medals	Price	Description
13	(1652) New England Shilling -- NGC AU58	\$295,000	Pop 2 with one finer. Mintage unknown. Ex. Kreisberg (69.4 gr.). You just don't see Shillings this nice. This fully original piece is well-centered and the sharpest strike that we have ever seen. The planchet is perfectly round, incredibly smooth and well detailed. In our opinion -- this piece could've graded mint state. ~ Last record shows this piece trading hands back in 1978. MORE ABOUT NE SHILLINGS: The New England coinage is of unparalleled importance as the foundational coinage of what is now the United States. The NE shillings had the origin and denomination stamps punched by hand on round blanks. The silver used for the coin production was obtained locally and the pieces would be melted, assayed, refined, and then cast into strips by mint master John Hull in order to produce coins for the owner of the silver. The initial NE coinage was produced for only a short period. NGC Price Guide...\$375,000.
58	Undated (ca. 1694) London Elephant Token - PCGS MS63BN	\$14,500	Pop 3 with 4 finer. Another superb example of the scarcer thin planchet format, one both more elusive and usually better struck than the thick planchet. This is on a virgin flan, with bright golden luster barely faded from mint color on the obverse and a mottling of gold, light brown, and violet blue on the reverse. Crisply struck, well centered on the obverse, trivially aligned to the right on the reverse virtually a problem free. A very high grade, nice looking example of the type. PCGS Price
921462	1723 Wood's Hibernia Farthing -- PCGS MS64	\$13,500	Pop 10 with 5 finer at PCGS. An exceptional and original specimen of this popular off-metal rarity. Fully struck and boldly detailed, with highly reflective surfaces at the obverse periphery and across the reverse. Deeply toned with gold in the central obverse fields intermingled with navy blue and deep violet on that side, while the reverse shows more champagne and pastel blue and violet. These silver farthings were not issued as regular coins, of course, so they must have had some other purpose that escapes us today." While some have conjectured, no one has ever come up with a good explanation of these pieces. This piece marries exceptional detail with choice originality and eye appeal in an unusual combination. This variety is known only in silver.
920818	1723 Wood Hibernia Halfpenny -- PCGS MS65RB	\$3,300	A simply beautiful type coin, a magnificent survivor of this issue. Richly lustrous and boasting most of the original mint color, lightly mellowed in the fields and on the devices.
63	(1789) Mott Token - Thick Planchet, Plain Edge -- NGC MS63 BN	\$1,150	Pop 8 with 11 Finer. Breen-1022. An uncommonly well preserved example of this intriguing early American token with glossy mahogany-brown surfaces that retain traces of mint frost. Late state of the dies with a large die break at the top left corner of the clock and spalling in the fields and peripheries of both sides. The exact origins of these tokens remain a mystery, but it is likely they were made at least a few decades after the 1789 date they bear and the die work appears to match that of some other tokens produced by Robert Lovett, Sr. in the 1830s. This is a choice and appealing example. No
236	1766 Pitt Halfpenny Token, Copper -- NGC MS65BN	\$25,000	Pop 2 with none numerically finer at NGC or PCGS. Rich mahogany-brown on the obverse with the soft glow of faded mint red undertones over much of the surface. These are incredibly rare in high grade. A Pitt halfpenny is on every colonial collectors want list. They exist in every grade, as they seem to have been commonly adopted among the circulating coppers for their size and similar design. Despite the relatively large numbers issued they are incredibly rare in high grade. NGC Price Guide...\$25,000.
246	1773 Virginia "Penny" -- PCGS PR64 BN	\$25,000	Mintage Unknown. Pop 3 with only 7 Finer. A lovely and impressive example of this classic colonial rarity. Both sides possess a rich and evenly distributed chestnut-brown patina, with flashy silvery-blue iridescence as well as a few hints of mint red. Crisply impressed from the dies and well centered on the planchet; one will be challenged to locate a singularly bothersome area of striking incompleteness, with the legends and devices standing in pinpoint definition. All told, simply a beautiful and high-end representative of this celebrated type. Struck on highly prepared planchets from a unique set of dies, the Virginia "penny" coins were never intended for commerce. While a few are known with evidence of circulation, most are fairly nice, well-preserved in the upper class 18th century English collections for which they were intended. As the most impressive form of the only truly "colonial" coin in the United States, the Virginia penny is a classic rarity, avidly sought in every state of preservation. Fewer than 30 examples are thought to exist. PCGS Price Guide...\$25,000
427	1787 New York Excelsior Copper, Eagle on Globe Left, Silvered -- NGC XF45	\$27,500	Single finest known at NGC. Mintage unknown. This impressive piece, which has smooth medium brown surfaces with olive-gray color where silvering remains is listed on page 64 of the 2024 Guide Book. One of the more famous and popular New York issues is the Excelsior Copper with the arms of New York on the obverse and a heraldic eagle on the reverse. On the front of the coin a smaller eagle is perched atop a small globe. On one variety, the eagle's head is turned right; on this one, the head is turned left. The two varieties appear to be of similar rarity.
731	1742-P Sou Marque, Dijon Mint -- PCGS XF45	\$275	Speckled steel and blue-gray toning to both sides, the reverse also with traces of iridescent reddish-gold.
731	1740-Q Sou Marque. Perpignan Mint. -- PCGS MS62	\$2,200	Sharply struck with full silvering and a bright frosty to semi-reflective finish - a rare set of attributes in a sou marque from the challenging Perpignan Mint.

731	1739-R Sou Marque, Orleans Mint -- PCGS AU55	\$1,750	A really exemplary example of this extremely rare punctuation variant, with a stop after the R mintmark on the obverse. The piece is a nice pale silver-gray in color, the hue nearly uniform across both surfaces.
731	1741/39-R Sou Marque, Orleans Mint -- PCGS XF45	\$290	Mottled steel and dove-gray patina with a few swirls of deeper charcoal in and around the central obverse.
731	1741/0/39-R Sou Marque, Orleans Mint -- PCGS AU58	\$725	Medium silver-gray with blended gold and pale rose toning on both sides.
731	1741/0/39-R Sou Marque, Orleans Mint -- PCGS MS61	\$950	A very sharply struck specimen with the clearest star/battleaxe over punching and a very bold overdate. The piece is a nice warm rose-gray in color.
731	1738-S Sou Marque, Reims Mint -- PCGS AU50	\$475	With nearly intact silvering to warmly toned, light rose and pewter-gray surfaces.
731	1740-S Sou Marque, Reims Mint -- PCGS AU Details	\$450	This is the final year of issue of the denomination from the Reims Mint. This specimen is pale gray in the fields, slightly darker on the higher points
731	1739-T Sou Marque, Nantes Mint -- PCGS XF45	\$250	Richly toned in copper-gray and steel-olive patina with traces of silvering that are clearest in the center of the obverse.
731	1738-V Sou Marque, Troyes Mint -- PCGS AU55	\$450	An attractive piece with full silvering, a generally bold strike, and appreciable mint frost.
731	1739-V Sou Marque, Troyes Mint -- PCGS MS63	\$3,300	Nice pale gold and gray in color on both sides. an impressively smooth appearance for surfaces that exhibit full silvering and strong luster.
795	1776 EG FECIT Continental Dollar, Pewter, CURRENCY -- PCGS MS63	\$117,500	Mintage Unknown. Pop 9 with 18 Finer at PCGS. Although the origins of the Continental dollar remain uncertain, they have long been ardently collected. This Newman 3-D variety is scarcer than Newman 1-C and Newman 2-C. This satiny and evenly struck representative has an untuned obverse. And the eye appeal is undeniable. The Continental "dollar" is an enigmatic type for which no specific documentation detailing its origin has ever been found. Numismatic scholars have been able to piece together a story that, up until recently, had become the generally accepted version of events. According to this story, resolutions passed by the Continental Congress on February 17, 1776, and May 9 of the same year provided for the issuance of paper money in various denominations, including a \$1 note. Resolutions passed later in the year on July 22 and November 2, however, omitted the \$1 note. Based on these facts and supported by the existence of these coins, it was theorized that the Continental Congress intended these pieces to serve in lieu of the \$1 note beginning in the latter half of 1776. The strike is sharp overall including Liberty's hair and the leaves on the wreath on the reverse. Outstanding surface quality with no mentionable distractions seen even when studied with a loupe. One of the four MS-66 coins certified by NGC of this more difficult date, with none finer. The deepest shades of color are located near the rims. Likely due to large-scale silver dollar production, the business strike mintage of the 1880 dime was only 36,000 pieces. Apparently, Philadelphia dealers at the time were aware of the issue's scarcity, and set aside examples in Mint State. Nonetheless, the date is rarely encountered in the present quality. NGC Price

Lovely rose-gold and mint-green hues adorn each side, adding to the eye appeal. Hints of lilac also appear in portions of the margins. . The San Francisco Mint struck only 96,000 Seated Liberty quarters in 1868, most of which went directly into circulation in the West, where silver coinage still circulated in the immediate aftermath of the Civil War. Mint State survivors are rare today in all grades, and only a handful of pieces are known in Gem or better condition. PCGS Price Guide...\$17,500.
5510	1878-S Seated Liberty Quarter -- NGC MS65	\$10,500	Pop 5 with none numerically finer. This Gem example is sharply struck and crisply defined with lustrous, bluish-gray surfaces and attractive olive overtones. There are no mentionable marks or abrasions to be seen on the smooth and appealing fields or devices. A diagnostic die line within the dentils above and to the left of star 8 helps identify authentic examples of this late-series, low-mintage San Francisco issue. The small arrow heads left and right of the date signified a minuscule weight change that occurred in 1873, with that design feature continuing in production the following year. At the time these coins were minted, dies were standardized with little variance from one to the next. However, the arrow heads were still hand-punched in the die, and can be used to identify different varieties. On this example, both appear to slant upward, following the curve of the border. A highly attractive Superb Gem, this lovely proof has obvious contrast and Both sides are fully mirrored with splashes of peripheral gold and iridescent toning on the obverse. 5715	1917 Standing Liberty Quarter -- NGC MS67 FH	\$7,900	Among the finest know. Only one numerically finer in MS68. PCGS #	Half Dollars (All Varieties)	Price	Description
6176	1837 Capped Bust Half Dollar -- NGC MS64	\$5,200	Lustrous, Choice for the Variety. Die cracks through the final stars, and clash marks in the field, combine to attribute the die marriage. The strike is sharp and you will find lustrous surfaces that are lightly toned and impressively devoid of contact. The reverse dentils remain strong. NGC Price Guide...\$5,750

6176	1837 Capped Bust Half Dollar, Reeded Edge -- NGC MS-65	\$12,500	Brief 50 CENTS Reverse Design Type. Both sides are dusted with pretty iridescent toning in vivid champagne-pink and golden-apricot. The strike is razor sharp to full. This coin and other high grade 1837 half dollars may owe their exceptional preservation to the Panic of 1837, which settled over the United States after New York City banks suspended specie payments on May 10, 1837. Bank customers could no longer exchange paper at par for specie, leaving paper money and copper coinage to carry the work of day-to-day business in most areas of the country. Millions of half dollars sat in bank vaults, despite the 1837 establishment of a bullion fund by Act of Congress that allowed the U.S. Mint to produce silver coins without waiting for deposits of bullion. By the time the panic subsided, allowing silver coins to reenter circulation, few Gems were left among the bank stockpiles. Today, more than 90% of Mint State 1837 halves certified by PCGS and NGC grade MS-64 or lower. For the quality-conscious type collector, this offering represents a fleeting bidding opportunity. NGC
6232	1839 Seated Liberty Half Dollar, Drapery Added -- PCGS MS65	\$17,500	None Finer at either service.. Radiant golden-bronze, violet, and aquamarine mingle with golden peach at the centers. The strike is exceptional for the issue. . Struck in the final few months of year, the Drapery design type is the most frequently encountered variety of 1839 Liberty Seated half dollars. Why the Drapery? Since Liberty seems to be hunched over in the No Drapery version of this coin type, a couple of quick changes were made before many pieces had been struck. The billowing gown to the left of Liberty's shield was reduced in size, while a three folds of drapery were added beneath her left elbow, and these fixes gave the figure a more balanced posture. PCGS Price Guide...\$25,000
6243	1843 Seated Liberty Half Dollar -- NGC MS65	\$6,500	Pop 4 with only one finer among all varieties. The 1843 half eagle dollar is rare at the Gem level regardless of variety. This variety represents the only use of this shattered reverse die, which shows a network of heavy die cracks that is reminiscent of a spider's web. The obverse die is also cracked around the periphery. This coin is featured on the cover of the reference book -- A Register of Liberty Seated Half Dollar Varieties, Volume V. The present coin displays luminous, frosty mint luster and delicate champagne tinting. The strike is sharp, and each side showcases outstanding preservation. NGC Price
6268	1852 Seated Liberty Half Dollar -- NGC MS66+	\$13,000	Only 2 numerically finer. Both in MS67. This remarkable GEM is the second FINEST graded example for this lower mintage date. Only 77,130 were struck for commerce and precious few were saved at the time of issue. There are just two graded higher at NGC, and there is nothing finer than MS66 at PCGS. Distinctive splashes of gold on the obverse will serve to identify this GEM beauty. Sharply struck, the details exquisitely executed and enlivened by bold satiny brilliance. 7007	1864 Seated Liberty Dollar -- PCGS PR67 CAC	\$62,500	Pop 2 with None finer at PCGS. Mintage...470. This is arguably the finest, most visually impressive Proof Liberty Seated silver dollar of this date available to today's discerning collectors. Wonderfully original, both sides are beautifully toned with iridescent undertones of gold, blue, lilac and pale pink backlighting dominant smoky olive-gray patina. Fully struck, as befits the method of manufacture, with strong reflectivity evident in the fields as the coin dips into a light. Expertly preserved and virtually pristine. 7018	1870 Seated Dollar -- PCGS PR65	\$8,750	Only 5 finer at PCGS. Mostly white. With 1,000 coins struck the 1870 boasts the highest mintage among Proof Liberty Seated dollars of the Motto design type. Survivors are scarce relative to the reported mintage, however, indicating that many examples may have remained unsold at the time of issue, thereby being lost to future generations of numismatists. PCGS Price Guide...\$14,500
7086	1879-CC Morgan Dollar, GSA -- PCGS MS63+	\$11,500	This piece is brilliant, frosty. A sharp strike completes the ensemble.. The 1879-CC Morgan dollar is the second scarcest issue in the series from this mint, trailing only the key-date 1889-CC. Most of the Mint State population known today came from the 4,123 pieces distributed in the GSA sales of the early 1970s.
87138	1882-O/S Morgan Dollar Weak -- PCGS MS65	\$9,500	Pop 3. None finer. A Top 100 Variety. Toned Obverse, blazing white reverse. PCGS holders often designate Strong or Weak for the 1882 O/S variety. The designation does not relate to the quality of strike, but rather to the visibility of the overmintmark. Any O/S variety is rare in the Gem Mint State condition of this example. Over the past decade, PCGS MS65 coins have sold in Auction only four times.
7148	1883-S Morgan Dollar -- PCGS AU55	\$500	Light mottled toning. PCGS Price Guide...\$525
97191	1889-CC Morgan Dollar -- PCGS MS64DMPL CAC	\$250,000	None Finer. Pop 6 between both services with the well-deserving CAC designation. This piece is brilliant and starkly contrasted, showing cameo surfaces and liquid-like fields. Frosty white luster adorns the devices, which are sharply struck. A distinct lack of notable abrasions gives this piece eye appeal beyond its technical grade. A beautiful 1889 Carson City Morgan dollar. It is the scarcest Carson City issue in the series and is one of the two major key dates overall along with the 1893-S. The 1889-CC is also famously one of the few Carson City issues that was not represented in any significant quantity in the GSA sales of the 1970s. Most Mint State pieces that survive are believed to have come from certain small hoards or bags from decades ago. The 1889-CC reigns supreme as the key date in the set of 'CC' silver dollars. 7220	1893 Morgan Dollar -- NGC MS65	\$5,850	Only 6 numerically finer. Pleasing satiny luster. The surfaces are brilliant with very slight hints of reddish-golden iridescence, mostly on the reverse. Mint State examples are scarce with a median grade of MS-63 or thereabouts; Gems comprise just a tiny fraction of the NGC-certified population.
7225	1893-O Morgan Dollar -- PCGS MS65+ DMPL CAC	\$375,000	None Finer. Tied for finest known at PCGS. Well-deserving of the CAC designation. This remarkable Gem is exceptional for the issue. The finish is semiprooflike in sheen with richly frosted devices and hints of reflectivity in the fields. Each side remains wholly brilliant, and neither exhibits a single noteworthy abrasion. This is a coin that is earmarked for inclusion in the finest Morgan dollar collection. With the lowest mintage among all New Orleans branch mint Morgan dollars (300,000 pieces), the 1893-O is a popular coin and a series semikey.
7294	1904-S Morgan Dollar -- PCGS MS66	\$25,000	Pop 19 with 2 Finer. Blast White. The 1904-S is one of the most elusive Morgan dollars in all grades, as much of the mintage of 2,304,000 pieces was likely melted under the Pittman Act in 1918. Release of coins from federal storage was limited and came to an end during the 1950s; there were none in the Treasury Department releases of 1962 to 1964. As one of the finest examples known to PCGS, this lovely coin represents a significant find for advanced collectors specializing in this popular series.PCGS Price Guide...\$28,500

Here is an elusive Gem example of the scarce Type II gold dollar, a visually stunning piece with a bold blend of light rose-gold color and billowy mint luster. Satiny in texture with remarkably smooth surfaces that are even largely free of the clash marks typically seen in examples of this type. A highly desirable specimen fit for the most sophisticated collector of U.S. gold type. DID YOU KNOW? The Philadelphia Mint was the only facility to produce the Type II gold dollar in 1854, striking 783,943 pieces of the new design along with 855,502 of the Type I dollars. Taken as a whole, the Type II design is by far the scarcest of the three basic types. Anywhere from 5,000 to 8,000 remain with maybe a quarter to a third in Mint State. The true rarity of the 1854 Type II gold dollars emerges at the Gem level, where only about 50 examples remain. PCGS Price Guide...\$30,000.
7531	1854 Type 2 Gold Dollar -- NGC MS65	\$24,500	Only 7 finer at NGC. Gorgeous Gem. He also moved the inscription UNITED STATES OF AMERICA to the obverse from the reverse. The reverse laurel wreath was replaced with the cereal wreath used on the three-dollar denomination and that was later adopted for the Flying Eagle cent. NGC Price Guide...\$27,500

Details are clear on Liberty's central hair curls, as well as throughout the shield lines on the reverse. The mintage for the 1798 BD-2 variety is believed to have constituted between 480 and 838 coins of the 1,094 pieces reportedly struck bearing this date. Plenty of frosty luster remains, and the strike is well centered and overall bold. With an estimated mintage of just 480 pieces, the 1806/5 is one of the most elusive issues in the Capped Bust Right quarter eagle series. It is one of the few varieties in U.S. coinage history struck from an obverse that was previously used in production of a different issue (1805 quarter eagle), annealed again, overdated, and then used to strike coins of another issue. Just 25 to 35 examples are believed extant in all grades.

Warm honey-olive color blankets both sides, which also reveal subtle rose highlights as the coin rotates under a light. The texture is frosty overall and quite smooth for an issue that, when offered at all, is typically noticeably marked. The strike is sharp for this type. One of the most eagerly sought issues among classic United States Mint gold coins, the 1808 is the only quarter eagle of the Capped Bust Left design. This type is credited to Assistant Engraver John Reich, whose "signature" is evident as a tiny notch on the outermost point of star 13 on the obverse. NGC Price Guide...\$225,000.

Soft satin luster blends with handsome deep orange-apricot color, the appearance attractively original, and uncommonly so for a pre-1834 U.S. Mint gold coin. The mirrored fields are greenish-gold, while the lustrous devices are brilliant yellow. The reverse also features a gold strike with brilliant and frosty light yellow-gold surfaces. A trace of orange toning is limited to the E of UNITED. In our opinion, the reverse, if graded separately would qualify at the MS64 or MS65 level. This impressive half eagle is the third finest of three known, meaning it is the "affordable" proof 1825 Over Partial 4 half eagle. This example from the Harry W. Bass, Jr. Collection is a one-sided proof with the obverse showing full proof characteristics, and the reverse showing no proof attributes. While there are those in the numismatic field that suggest one-sided proofs are impossible, this coin and several other early proof half eagles suggest otherwise. There are one-sided proofs of other denominations known as well. The obverse die was highly polished and one side of the planchet was specially prepared to receive the obverse die impression. That combination of procedures is not coincidental. This piece and the other proof 1825/4 half eagles were

Featuring a bold blend of honey-orange color and softly frosted luster, the surfaces make a lovely impression on the eye. The year 1864 is a magic one within many U.S. coinage series. Not only is it the final full year of conflict in the Civil War, but it also saw the creation of many low mintage issues that now rank among the key dates for their types. The 1864-S half eagle is no exception; the mintage was a paltry 3,888 pieces and survivors number 20 to 30 coins after the rigors of commercial use took their customary toll. The 1797 is the scarcest date in the brief Capped Bust Right, Small Eagle ten-dollar gold series of 1795 to 1797. This is a well produced example with most design elements boldly to sharply defined. This is the only known obverse die state of this variety, and the latest known for this workhorse die that was also used to strike the 1797 BD-2 and BD-3 eagles. In this die state, there are prominent die cracks through the second digit 7 in the date. BD-4 is the most readily available die marriage of the 1797 Heraldic Eagle ten, just barely edging out BD-2 for this distinction. This is a variety with no more than 110 coins believed extant which is scarce when viewed in the wider context of U.S. numismatics.. PCGS Price Guide...\$100,000.

MORE ON THIS COIN: According to Mint records, the Philadelphia Mint struck a substantial production of 37,449 Capped Bust Right eagles in 1799. Ten die varieties are known for the date, two with Large Stars on the obverse and eight with Small Stars. This coin represents the BD-10 variety, with Large Stars on the obverse and the leaf touching the foot of the I in AMERICA. This was the second, and final, use of the obverse die, which was used previously to strike the BD-9 variety of this date. 8910	1853-O \$20 Liberty -- NGC AU58	\$25,000	Only 7 finer at NGC. 2 Finer at PCGS. Bright golden-honey surfaces retain abundant proof-like reflectivity with tinges of pale rose and olive patina also discernible with patience. The strike is razor sharp throughout the design. This is an important coin for the advanced double eagle or New Orleans Mint enthusiast, as relatively few 1853-O \$20s survive from the mintage of 71,000 pieces. New Orleans Mint double eagles were important to trade in their day - by steamboat up the Mississippi River connecting to inland cities and towns, and by sea to foreign countries. It is little wonder, then, that issues such as the 1853-O saw intense use, and suffered a high rate of attrition. CDN Collectors Price Guide...\$28,800

8934	1861-O \$20 Liberty -- NGC XF45	\$37,500	Historic rarity. The desirability of the 1861-O double eagle is well established in numismatic circles and stems from two important characteristics of this issue. First, the 1861-O is a scarce issue in all grades with no more than 175 coins believed extant from a mintage of 17,741 pieces. Second, the mintage for the 1861-O comprises coins that were struck under three different governments - a unique occurrence in the Liberty Head double eagle series and a circumstance that has affected few other issues throughout U.S. coinage history. The mintage for the 1861-O can be divided as follows: January 1-26, 1861: 5,000 coins struck under the authority of the United States of America. January 26-March 31, 1861: 9,750 coins struck under the authority of the State of Louisiana after it seceded from the Union and took over control of the New Orleans Mint. 8937	1862 \$20 Liberty -- NGC AU58	\$31,500	Pop 15 with only 8 finer. Here's a rare Choice AU survivor of a low mintage double eagle issue that is scarce even in lower circulated grades. DID YOU KNOW? After striking a record total of 2,976,453 circulation strikes in 1861, the Philadelphia Mint delivered just 92,133 double eagles for commerce in 1862. This marked reduction in output is a result of the suspension of gold specie payments by Northern banks in late 1861 due to the uncertain outcome of the Civil War. Most examples of this issue were used in export trade, and survivors are scarce, representing coins that have been repatriated in recent decades. Fewer than 350 coins are believed extant in all grades, and in Mint State the estimate dwindles to only 35 to 50 pieces. NGC Price Guide...\$47,500.

8961	1871-CC \$20 Liberty -- NGC AU55	\$87,500	Seldome seen finer. The 1871-CC double eagle is one of the principle rarities of the denomination struck at Carson City, second only to the vaunted 1870-CC. The 174,387 coins produced at the Nevada facility that year were destined for immediate use in commerce, where gold was the vastly preferred medium of exchange. Thanks to its somewhat remote location in regard to other population centers at the time, the coins were heavily used in local circulation for many years. There were essentially no numismatists in the region, hence nobody had the interest or wherewithal to set aside an example at the time. Very few escaped the trials and tribulations of extensive circulation. NGC Price Guide...\$137,500.

Many were shipped overseas after they had circulated in regional commerce. Some 1,100 to 1,300 examples of the 1877-CC are known in all grades. NGC Price Guide...\$27,500

9003	1885 \$20 Liberty -- PCGS AU55	\$59,500	Pop 10 with only 22 finer. This attractive 1885 is a thoroughly appealing example of a legendary rarity among circulation strike Type III double eagles. Wonderfully original surfaces offer handsome honey-gold color and ample remnants of mint luster. Boldly defined overall from a well executed strike, with an uncommonly smooth appearance in hand for a large size gold coin that saw light commercial use. One of the most eagerly sought issues among key date Liberty Head double eagles, the circulation strike 1885 has a mintage of just 751 coins. PCGS Price Guide...\$85,000.
9004	1885-CC \$20 Liberty -- NGC AU50	\$21,500	Mintage of only 9,450. This issue is elusive even at the VF and EF levels, the grades assigned to most survivors. Approaching Mint State, as here, the 1885-CC is rare and always in demand among advanced collectors of double eagles and Carson City Mint coinage. It's estimated that 275 to 400 circulated examples have stood the test of time.
9004	1885-CC \$20 Liberty -- NGC AU55	\$27,500	Only 9,450 double eagles were coined at the Carson City Mint in 1885, by far the smallest production figure of any \$20 from this facility during the 1880s. 11420	1839 Half Dollar In Bronze, J-98 Restrike -- PCGS PR65BN	\$26,800	Pop 2. None Finer. Mintage unknown. Ex: Bass-Simpson. This piece is a spectacular Gem, with razor-sharp definition on all design elements. The well-preserved surfaces are attractively toned in vivid shades of green, orange, and amber, with moderately reflective fields underneath. Overall eye appeal is outstanding. ON THE OBVERSE: Liberty wears a coronet inscribed LIBERTY with her hair tied at the back of her head. The backward or right facing Liberty head design is similar to the one appearing on the 1839 half eagles and eagles. The date, 1839, appears below the bust with 13 stars equally spaced along the border. ON THE REVERSE: is the regular issue No Motto half dollar design with Large Letters as used from 1842 to 1853 and from 1856 to 1866. Struck in bronze with a reeded edge.
11721	1855 Large Cent, J-168 Original - PCGS PR64RB	\$5,500	Ex. Garrett. Thirteen stars surround an eagle flying slightly upward, similar to that seen on the Gobrecht dollar reverse. The reverse is based upon the then-current large cent, but the wreath is diminished in scale. PCGS Price Guide...\$6000
12020	1859 Gold Dollar, J-256 -- PCGS PR64BN	\$6,750	Pop 3 with none finer. Ex: Simpson. The obverse is similar to that used on the regular issue 1859 gold dollar, but the letters are slightly taller. The reverse is also similar to the regular issue, but the letters in DOLLAR are taller. Struck in copper with a reeded edge.

60820	1868 Three Cent Nickel, J-618-- NGC PF65 CA	\$1,800	Only one finer. Obv: A bust of Liberty faces left, the portrait very similar to that used on regular-issue nickel three-cent pieces. The legend UNITED STATES OF AMERICA is around the border and the date 1868 is below. Rev: Also similar to the regular-issue nickel three-cent pieces with a Roman numeral III set within a laurel wreath. The obverse and reverse are fully brilliant. The strike is bold throughout and the designs are well executed.

9999	1814 Great Britain BHM-844 Silver Indian Peace Medal -- NGC UNC Details	\$13,900	Ex. John J. Ford, Jr. 1814 George III Indian Peace Medal. Silver. First Size. Adams-12.1. 75.5 mm. 1871.1 grains. Lovely medium gray silver with soft blue-green, rose and gold toning on both sides that adds considerably to the visual appeal. Clearly an issued medal, but one that saw very little actual wear. This was the largest of the 1814-dated medals produced for award to Native Americans in the later days of the War of 1812. The British relied heavily upon Native Americans in their war effort. Distribution of medals as markers of allegiance was rampant, so much so (as related by Adams), a Captain Bulger, Commander at Green Bay, wrote in 1815 that "", formerly a chief would have parted with his life rather than his medal. Missing the original suspension hanger, leaving behind the piercing at 12 o'clock that is on all issued medals, so the "holed" designation from NGC really does not make sense as a grading qualifier on this, or any medal like it. This is exactly how they were issued (with a hanger), and this is a particularly attractive example.
