587	1779 Rhode Island Brass Token - Wreath Below Ship - NGC MS63	\$7,000	Pop 1. None Finer At NGC. Mintage Unknown. The Wreath Below Ship variety was the final issue of this popular token. This handsome Mint State piece has plenty of original antique gold color beneath an overlay of mottled gray-brown patina. Both sides of this piece are equally well defined with universally bold striking detail. Satiny in texture with an overall smooth appearance. Lustrous greenish-yellow surfaces. MORE ABOUT THIS PIECE: The obverse of Rhode Island Ship medals depict the flagship of British Admiral Lord Richard Howe and is anchored with the peripheral legend DE ADMIRALS FLAG van ADMIRAL HOWE 1779. The reverse shows Aquidneck island as the central motif with three warships to the left, about two dozen troops on the island, and soldiers fleeing in thirteen small boats to the right. The peripheral legend reads D'v'lugtende AMERICAAN ENvan RHODE YLAND Augt 1778. PCGS Price Guide...\$8000. No NGC price Guide Information.

2000	1857 Braided Hair Cent, Small Date -- PCGS MS66BN	\$9,750	Pop 4. None Numerically Finer at either service. This SUPERB PR large cent has bold eye appeal. The devices are sharp, with detail in Liberty, Æd's hair, being well-defined. The deep chocolate patina is consistent throughout. This piece is nicely struck, with broad, high rims typical of the issue and offers very pleasant eye appeal. PCGS Price Guide...\$12,500
2238	1909-S Indian Cent -- NGC F12 BN	\$350	NGC Price Guide...\$425

PCGS #	Three Cent Nickels	Price	Description
93763	1867 Three Cent Nickel -- PCGS PR66 DCAM	\$3,950	Mintage...625. Rare Deep Cameo Example. A splendid black-and-white Premium Gem, with sharp features, deeply mirrored fields, and frosty silver-gray devices. The bright proof surfaces seem mark-free. PCGS Price Guide...\$5,250.
83770	1874 Three Cent Nickel -- NGC PF67 Cameo	\$3,300	No Finer Pieces Certified. Lustrous light gray devices and lightly mirrored fields characterize this brilliant and untuned Superb Gem Cameo proof. NGC Price Guide for a common date...\$4250.
PCGS #	Nickels (All Varieties)	Price	Description
83826	1872 Shield Nickel -- NGC PF67+ Cameo	\$4,950	None Finer. Mintage...950. Each side exhibits phenomenal white-on-black contrast. The devices feature a blanket of pronounced mint frost, set against deeply reflective, jet-black fields. The 1872 Shield nickel was well-represented by a production of more than 6 million circulation strikes. However, the reported proof mintage is estimated to be only 950 pieces. NGC Price Guide in PF67 (NOT A PLUS)...\$4,750. CDN Price Guide in PF68...\$6,880.
83828	1874 Shield Nickel -- NGC PR67 Cameo	\$3,950	Tied for finest known. Only 700 proof Shield nickels were struck in 1874 and few survivors can match the technical quality and eye appeal of this delightful Superb Gem. The design elements are sharply detailed and frosty, providing noticeable cameo contrast with the deeply reflective fields. Impeccably preserved with golden accents. NGC Price Guide...\$5,000.
3915	1913 Type 1 Buffalo Nickel -- NGC MS68	\$5,100	Among the finest survivors. As a group, Buffalo nickels are often hampered by strike issues. The 1913 Type One nickels are in many ways an exception, with a few splendid Superb Gem examples that portray James Earle Fraser's intended design in all its craggy splendor. This is one of those superlative Mint State nickels, elegantly toned in reddish-gold hues and needle-sharp throughout both sides. NGC Price Guide...\$7,000.
3923	1913-S Buffalo Nickel - NGC XF40	\$420	NGC Price Guide...\$500
3926	1914-S Buffalo Nickel -- PCGS MS66 CAC	\$9,000	Only 4 Finer. Well deserving of the CAC Sticker. Delicate silver-apricot iridescence blends with soft satin luster on both sides of this charming Gem example. The strike is impressively sharp with most design elements fully rendered and crisp. A mintage of 3.47 million pieces is limited by Buffalo Nickel standards, thus confirming the 1914-S as a semi-key issue in all grades. Most survivors grade no finer than MS-64, and this issue is rare at and above the MS-66 level. NGC Price Guide in NGC 66...\$6000. In MS67...\$18,500.
3962	1927-S Buffalo Nickel -- NGC MS65	\$9,500	Only 6 finer between both services. Well struck with satiny mint luster yields delicate golden toning, while no major abrasions distract from the eye appeal. Mint State examples are challenging even at the Choice level, but the issue is one of the principal condition rarities of the entire series in Gem. NGC Price Guide...\$13,000.
3984	1938-D Buffalo Nickel -- NGC MS66	\$60	Greysheet...\$62
PCGS #	Half Dimes (All Varieties)	Price	Description

4272	1805 Draped Bust Half Dime -- NGC AU58	\$29,500	Pop 2. None Finer. LM-1, the only known dies. Rarity-4. This is a remarkable near-Mint quality example of this scarce and conditionally challenging early half dime. Satiny in texture and impressively smooth, both sides are warmly toned in silver-rose and light steel patina. Vivid multicolored undertones include reddish-pink, champagne-gold and powder blue. The strike is typical for this challenging die pairing. The strike is appreciably bold and overall design is fully appreciable. The final year of issue for the Draped Bust design type and a single die marriage issue, the 1805 is also the last half dime produced by the United States Mint prior to 1829. The generally accepted mintage for this issue is 15,600 pieces, a total that was quickly reduced by commercial use. No more than 2% of the mintage is thought to have survived to the present time. The average APR over the past 10 Year for an AU58 is \$34,890. CDN Greysheet Bid...\$35,000. NGC Price Guide...\$51,000!
4317	1838 No Drapery Half Dime -- NGC MS66	\$1,950	This attractive mark-free Premium Gem boasts a rainbow of colors with about half the obverse balanced in silvery luster and the reverse surrounded colorful tones around the border of a lustrous white center. NGC Price Guide...\$3,250.
4332	1843 Seated Liberty Half Dime -- NGC MS68	\$8,900	Pop 1. None Finer. The present boldly struck Superb Gem exhibits vibrant rose-red, cobalt-blue, and gunmetal-gray periphery toning on the reverse. The obverse is dappled in medium navy-blue and magenta shades. An interesting triangle-shaped strike-through (as coined) is noted on the obverse rim near 6 o'clock. No NGC Price Guide Information available. CDN Price Guide for a common Date...\$10,000.
4438	1859 Seated Liberty Half Dime -- NGC PF65	\$1,950	Mintage...800. A needle-sharp Gem with smooth, glassy fields. Peach-gold, lavender, and ocean-blue toning graces both sides. NGC Price Guide...\$2850
<b>PCGS #</b>	<b>Dimes (All Varieties)</b>	<b>Price</b>	<b>Description</b>
4529	1837 Capped Bust Dime -- NGC MS65+	\$7,500	Pop 1. Only 3 finer at NGC. This is one of the finest 1837 JR-1 variety that we have ever seen. Besides its lofty grade, this richly toned Gem is consequential for its centering. It has been struck a few degrees off-center toward 8 o'clock, with the obverse rim much wider at 2 o'clock than at 8 o'clock. The motifs are boldly struck, and the coin exhibits rich forest-green and plum-red patina. NGC Price Guide in MS65...\$10,000. In MS66...\$20,000
4679	1876 Seated Dime -- NGC MS67	\$1,950	Only one finer known at NGC. It's as good as it gets. Attractive rich and radiant luster on the obverse and mostly white reverse can be found on this Premium gem Seated Dime. Well struck and fully detailed. NGC Price Guide...\$2500.
4817	1898-S Barber Dime --- NGC MS67	\$12,500	Pop 1. None Finer. This San Francisco issue is surprisingly scarce in any Mint State grade, and coins designated finer than MS64 are notably rare. In MS67, this piece is the sole finest certified at NGC, tied with a single PCGS in this grade for finest 1898-S dime overall. The PCGS piece in this grade appeared in auction 15 years ago where it realized \$25,300! This coin represents the ideal acquisition for Registry collectors. Satiny luster is entirely unabraded, yielding warm iridescence in the fields. The strike is sharp, and eye appeal is outstanding. CDN Greysheet Bid...\$20,000. NGC Price Guide...\$20,000.
4857	1911 Barber Dime -- PCGS MS67 CAC	\$2,250	Only one finer at PCGS. An impressive Superb Gem Barber dime at many levels. The frosty surfaces present lively cartwheel luster, boldly struck devices, and a splash here and there of original dee charcoal patina. Laden with eye appeal and readily among the finest examples of the date extant in a PCGS holder. PCGS Price Guide...\$2250.
5076	1941 Mercury Dime -- PCGS PR65	\$155	Blazing White
5077	1942 Mercury Dime -- NGC PF65	\$155	Blazing White - 2 Available
<b>PCGS #</b>	<b>Twenty Cent Pieces</b>	<b>Price</b>	<b>Description</b>
5304	1876 Twenty Cent Piece - NGC PF65	\$6,250	Only 14 Finer at NGC. Mintage...1,260. Originally Toned, Bold Eye Appeal. The "Centennial bump" in 1876 proof set sales did not meet expectations, so the Mint dealt with the excess by releasing unsold proofs into normal circulation. High-grade proofs that survive do so from a considerably smaller mintage than the 1,260 pieces reported by Mint records. This is a sharply struck twenty cent proof, with well-mirrored fields that display dappled tan-gold toning and blue border accents. NGC Price Guide...\$7,200.
<b>PCGS #</b>	<b>Quarters (All Varieties)</b>	<b>Price</b>	<b>Description</b>
5316	1807 Draped Bust Quarter -- NGC MS65	\$87,500	Pop 2. Only 2 Finer. This spectacular and colorful Gem is well defined around the peripheries and on the stars above the eagle's head. The Draped Bust Quarter represented the first series of quarter dollars struck within the United States. The series was produced with two distinct reverse designs, creating two different subtypes. The first subtype was issued for only a single year in 1796. After a gap in production, the second subtype was issued from 1804 to 1807. The second reverse design (used for this particular coin) was introduced in 1804 and used for the duration of the series. A heraldic eagle appears at center with its wings spread and a shield at its breast. The eagle's talons separately hold an olive branch and a bundle of arrows, and the eagle's beak holds a ribbon inscribed E PLURIBUS UNUM. NGC Price Guide...\$100,000
5445	1858 Liberty Seated Quarter -- PCGS MS65 CAC	\$3,100	This example is mostly brilliant with just a hint of pastel-lemon color on the obverse and smooth satin to softly frosted luster. The 1858 is challenging to find in Gem Mint State. PCGS Price Guide in MS65...\$2750. In MS66...\$5000.
5555	1859 Seated Liberty Quarter -- PCGS PR65	\$2,950	Pop 10 with 6 finer at PCGS. Mintage...800. The light gray surfaces of this spectacular Gem proof exhibit green-gold and blue toning on both sides. Sharply defined, this piece has fully mirrored fields that frame the lustrous devices, imparting slight contrast but is insufficient for a Cameo designation. From a mintage of 800 pieces in the second year of the Mint's commercial proof offerings. PCGS Price Guide...\$3,600.
5588	1887 Liberty Seated Quarter -- NGC PF62	\$575	Brilliant White. Mintage...710. Greysheet...\$520
5978	1939 Washington Quarter -- NGC PF65	\$145	White
5979	1940 Washington Quarter -- NGC PF65	\$120	White

<b>PCGS #</b>	<b>Half Dollars (All Varieties)</b>	<b>Price</b>	<b>Description</b>

6319	1866 Liberty Seated Half Dollar With Motto -- NGC MS66	\$5,950	Pop 4. Only 3 finer at NGC. Misplaced Date, WB-102, FS-302. The top of a 6 looms above the dentils below the second 6 in the date. The Cherrypickers' variety is not to be confused with FS-301, which shows traces of date digits on the rock above the date. This high-grade half dollar features a bold strike and unabraded fields. Light to medium cream-gray, powder-blue, and wheat-gold toning confirms the originality. NGC Price Guide...\$9500.
6442	1881 Liberty Seated Half Dollar - Type 1 reverse -- PCGS PR65	\$2,250	Mintage...975. An originally and moderately toned specimen with iridescent multicolored undertones. Here is a gorgeous Gem quality coin, one of 975 Proofs struck for the date. PCGS Price Guide...\$3700.
86443	1882 Liberty Seated Half -- NGC PF65 Cameo	\$1,950	Light attractive tones with a few tone spots on the obverse. NCG Price Guide...\$4350
6461	1892 Barber Half Dollar -- PCGS MS65	\$1,495	PCGS Price Guide...\$1850
6476	1896-S Barber Half Dollar -- PCGS MS64	\$3,250	Like the 1896-S Barber quarter, this half dollar issue is a better date in the series. Examples are scarce but obtainable in near-Gem condition. Soft mint luster radiates beneath shades of deep steel-gray patina. PCGS Price Guide...\$5000.
6490	1901-O Barber Half Dollar -- NGC MS65	\$10,000	Pop 6. Only 4 Finer. The 1901-O Barber half dollar is seldom seen in any Mint State grade, but examples in Gem condition are especially scarce. This piece displays satiny luster with subtle reflectivity in the fields. Amber, violet, and blue border toning surrounds golden interiors. NGC Price Guide...\$11,000, CDN Retail Price Guide...\$13,000.
6500	1904-S Barber Half -- NGC MS65	\$27,500	Pop 1. Two Finer. Blazing white. A meager mintage of 553,038 Barber half dollars was accomplished at the San Francisco Mint in 1904. Most of the mintage circulated heavily in the regional economy and few high-quality examples were saved by contemporary collectors. As a result, the 1904-S is one of the most challenging issues in the Barber half dollar series, especially in high grade. This spectacular Gem exhibits sharply detailed design elements. The virtually pristine brilliant surfaces are lustrous and appealing. NGC Price Guide...\$38,500.
6502	1905-O Barber Half Dollar -- PCGS MS65 CAC	\$4,200	Pop 11 with only 10 Finer at PCGS. This CAC-endorsed Gem is well-preserved with light golden toning. Seldom do Mint State survivors of this challenging New Orleans Mint issue possess the above average striking quality and superior surface preservation of this piece. Detail on the obverse and reverse is universally full. Value priced when compared to the PCGS Price Guide comps shown below. PCGS Price Guide in MS65...\$4,500; in MS66...\$5,750
6502	1905-O Barber Half -- PCGS MS66	\$4,800	Pop 5. The 1905-O is surprisingly scarce in Mint State. Such coins, when encountered, typically grade MS62 to MS64. Premium Gems are very rare. The present Registry Set prize is well struck with lustrous, unmarked surfaces with rich apple-green and plum-red patination. PCGS Price Guide...\$6750.
6514	1908-O Barber Half Dollar-- NGC MS67	\$5,750	Pop 4 with only one finer at NGC. Gorgeous multicolor toning shrouds the surfaces in shades of violet, blue, green, yellow, and golden-orange. The underlying fields are exceptionally clean with lively satin luster. The reverse is noticeably strong with complete detail. NGC Price Guide...\$10,000.
<b>PCGS #</b>	<b>Silver Dollars (All Varieties)</b>	<b>Price</b>	<b>Description</b>
6865	1797 Draped Bust, Small Eagle Bust Dollar -- NGC AU53	\$14,900	10x6 Stars, Large Letters, B-3, BB-71. The 1797 Draped Bust dollar boasts the lowest reported mintage of the type, at a minuscule 7,776 pieces, with three die varieties known for the date. The present coin represents the BB-71 variety, with the obverse stars arranged in a 10x6 pattern. This was the only use of both the obverse and reverse dies. Only light wear shows on the bust shoulder and eagle's breast, but Liberty's curls and the leaves on the right side of the wreath show some incompleteness of detail, due to lapping. The pleasing surfaces are richly toned in shades of golden-brown and lavender-gray, with traces of original mint luster underneath. NGC Price Guide...\$17,500.
6873	1798 Large Eagle Bust Dollar -- NGC VG8	\$1,100	Greysheet...\$1250
6878	1799 Draped Bust Dollar -- NGC MS61	\$24,500	Bowers Die State III-IV. A crisply struck and unworn example with noticeably prooflike fields. The medium gunmetal-gray surfaces reveal aquamarine borders and straw-gold centers when the piece is rotated beneath a light. The upper-right reverse displays moderate adjustment marks (as struck), prominent only on the cloud beneath the F in OF. Both sides are uncommonly free from abrasions. This piece ranks among the finest examples. NGC Price Guide...\$26,000.
6878	1799 Bust Dollar -- NGC F12	\$1,575	Greysheet...\$1750. PCGS Price Guide...\$2100
6883	1799/8 15 Stars Reverse -- NGC MS63+	\$49,500	Bowers Die State III. The 1799/8 BB-141 variety is quickly distinguished by the overdate and the two star points extending from the reverse clouds at the left and right. This attractive piece exhibits ocean-blue, lavender, and golden-brown toning. It's well struck and satiny surfaces are predominantly smooth. The 15 Stars Reverse is thought to be an engraver's error, with 13 stars intended. Upon realizing his mistake, the engraver expanded the left and rightmost clouds in an attempt to efface the additional stars. But lower points of the errant stars remain, and this variety is sufficiently distinct to merit its own Guide Book listing. NGC Price Guide...\$68,500.

PCGS #	\$2.5 Gold Quarter Eagles	Price	Description
7943	1911-D \$2.5 Indian -- NGC AU58	\$4,400	Key Date. Nice, bright, fresh and original example with strong central details and a well-defined mintmark.
7959	1910 \$2.5 Quarter Eagle -- NGC PF67 (Star)	\$59,500	Pop 10 in PF67. Only 2 have the Star Designation with 3 Finer at NGC. The fields display a slightly granular texture and the coin overall is bright with an even reddish-gold color. There are no contact marks on either side that would prove helpful in an attempt to trace the pedigree of this magnificent proof quarter eagle. MORE ABOUT THIS COIN: Only one pair of dies was used to strike the 682 proofs officially recorded for this year. It is generally believed that most of this mintage were spent. The reason was that the October issue of the Numismatist reported none had been struck. Collectors then rushed in orders, greatly inflating the number actually needed by proof gold collectors, then when they realized proofs were not as rare as previously believed many were released into circulation. Still, only 90 to 110 proofs are believed to exist today in all grades. NGC Price Guide in PF60 (NO STAR)...\$60,000. In PF68...\$100,000
7960	1911 \$2.5 Quarter Eagle -- NGC PF67+	\$52,500	Pop 2. 12 numerically Finer at NGC. The Mint returned to using a sandblast finish in the production of proof quarter eagles in 1911, of which 191 pieces were manufactured. It's estimated 100 to 120 examples exist. The sandblast surface on this piece is truly remarkable with both sides bathed in rich gold patina. Thousands upon thousands of tiny, sparkling facets individually sparkle beneath a light. This is only one of only two Plus-graded Superb Gem matte proof 1911 quarter eagles with the other at PCGS. The rich matte surfaces showcase bold detail and original gold color with not a single discernible flaw. A truly remarkable type coin and a matte proof of incredible conditional rarity. NGC Price Guide in PF67...\$50,000. NGC Price Guide in PF68...\$77,700.

PCGS #	\$5 Gold Half Eagles	Price	Description
8103	1808/7 Capped Bust Half Eagle -- NGC AU58	\$13,500	This specimen is quite nice, especially for the grade, with satiny soft luster and plenty. It's well struck and the stars are generally sharp and you will find plenty mint luster in the protected areas. It's really a pleasing example of this rare variety. The mintage of the overdate is unknown as it was included in Mint reports among the total for 1808, which was 55,578 coins. Most "transition year" overdates (those made from dies left over from the previous year but having one digit modified, a cost-saving move on the Mint's part, back in 1808) are generally quite scarce because only one such die was typically used, until it wore out.
